APPENDIX A	A-1
SUMMARY OF DISTRICTS AND ENABLING LEGISLATION	

PURPOSE AND SCOPE OF STUDY

The Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 (Government Code Section 56000 et. seq.) known as the C-K-H Act became effective on January 1, 2001. This Act is the enabling legislation for Local Agency Formation Commissions (LAFCOs). One of the provisions states that "...one of the object(ives) of the commission is to make studies and to obtain and furnish information which will contribute to the logical and reasonable development of local agencies...and to shape the development of local agencies so as to advantageously provide for the present and future needs of (the) county and its communities" (Government Code Section 56301).

The most recent comprehensive study of special districts in Ventura County was prepared eight years ago in 1993. This 2001 study is an update report that provides information on the independent and dependent special districts in Ventura County and summarizes the changes to those districts that have occurred over the last 29 years since the first Special District Study in 1972.

Special districts are a vital component of the local governmental structure. There are more special district governments than any other types of local governments. Most provide services essential to the public health and welfare. Many districts overlap the territory of cities and other districts. Consequently, several public agencies with separate purposes may serve the same group of constituents or customers. All special districts in Ventura County were formed for a specific purpose or situation. However, circumstances may change and it is important to periodically review the organization of local governments to determine if the initial purposes for creating a district are still valid and/or changes are necessary.

In May 2000, the Little Hoover Commission, a bipartisan independent state oversight committee, completed a report on special districts, *Special Districts: Relics of the Past or Resources for the Future?*. The Little Hoover Commission reported that there was a general lack of oversight and citizen involvement necessary to promote efficient operation and evolution of special districts. It stressed a need to require that special districts make their activities visible to the public. In this special district study, LAFCO has inventoried all existing districts in Ventura County and has included the contact information of each district, a listing of current board members, day and times for district meetings and meeting locations to provide for better visibility and understanding of each district.

The C-K-H Act requires that every five years LAFCOs conduct service reviews of the services within the county prior to or in conjunction with mandatory updates of sphere of influence boundaries for cities and special districts (Government Code Section 56430). This new mandate for LAFCOs will be more comprehensive than the basic surveys and reviews of special districts previously conducted by LAFCO. Thus, this special district "study" is really more of an initial survey that will be used as background for the service review process.

SPECIAL DISTRICTS STUDY 2001

This Special District Study includes only initial recommendations and base information for all special districts, with the focus on independent special districts. Maps of each district's sphere of influence and district boundaries are also included. Besides providing an overview of each district, fiscal information for each independent district is provided for the last three fiscal years.

SPECIAL DISTRICTS

The Government Code separates special districts into three categories; independent, subsidiary, and all others. The districts that are not considered independent are commonly known as dependent.

Independent special districts include special districts having a legislative body all of whose members are elected by registered voters or landowners within the district, or whose members are appointed to fixed terms. (Government Code Section 56044)

Dependent special districts are districts not in the category above. Included are districts governed by County Supervisors or City Council members or districts whose members are appointed for other than fixed terms.

Many improvement, maintenance, and assessment districts have been formed in Ventura County to finance means for local services. These entities are not discussed in the Study as they are not "special districts" as defined within C-K-H and are not, therefore, under the jurisdiction of LAFCO. Special districts are further defined in Government Code Section 56044.

BOUNDARIES VERSUS SPHERES OF INFLUENCE

A District has jurisdiction in a certain area of territory known as district boundaries. These boundaries establish an area that the district may serve and in which it may collect property taxes, assessments, and/or service revenues from residents and/or property owners.

A sphere of influence is defined in Government Code Section 56076 as a plan for the probable physical boundaries and service area of a local governmental agency. Government Code Section 56425 further requires that LAFCO develop and determine the sphere of influence for each city and district and that the Commission enact policies designed to promote the logical and orderly development of areas within the sphere. Spheres of influence are to be used for policy direction for the present and future organization of local cities and districts and guide efficient uses of services, both jurisdictional and public serving. The Ventura LAFCO has been adopting both new and amended spheres of influence since 1972. The sphere of influence limit may be co-terminus or outside the existing district boundaries. Importantly, districts are precluded from providing services outside their sphere of influence.

SPECIAL DISTRICT INVENTORY

The number of independent and dependent special districts has changed since the last Special District Study in 1993. Instead of 49 total special districts, the County now has a total of 50. Although it appears that there is only one additional special district, the actual composite inventory of special districts has changed.

TOTAL 1993 **49**

<u>District</u>	<u>Action</u>	
Moorpark Mosquito Abatement District	Dissolved (8-27-98)	-1
Simi Valley County Sanitation District	Merged with City of Simi Valley (12-28-95)	-1
Fox Canyon Groundwater Management Agency	Now recognized as an independent special district (formed in 1982)	+1
Ojai Basin Groundwater Management Agency	Now recognized as a dependent special district (formed in 1991)	+1
Ahmanson Ranch Community Services District	Formed (12-28-93)	<u>+1</u>

TOTAL 2001 **50**

STUDY RECOMMENDATIONS

As mentioned above, the C-K-H Act requires that every five years starting with the year 2001, LAFCOs are required to complete service reviews for all special districts and cities within their county. The State Office of Planning and Research is developing Service Review Guidelines to assist LAFCOs in their assignment to conduct service reviews.

Pursuant to Government Code Section 56430, "In order to prepare and to update the spheres of influence...the commission shall conduct a service review of the municipal services provided in the county". The section further adds that the commission include an analysis of the current designated services for a geographical area and shall prepare a written statement of its determinations with respect to each of the following:

- 1) Infrastructure needs or deficiencies;
- 2) Growth and population projections for the affected area;
- 3) Financing constraints and opportunities;
- 4) Cost avoidance opportunities;
- 5) Opportunities for rate restructuring;

SPECIAL DISTRICTS STUDY 2001

- 6) Opportunities for shared facilities;
- 7) Government structure option, including advantages and disadvantages of consolidation or reorganization of service providers;
- 8) Evaluation of management efficiencies;
- 9) Local accountability and governance.

Although the service reviews will be conducted within the next five years, this Special Districts Study lays the foundation of the review that LAFCO will soon initiate. The recommendations made for each district in this document were based on general observations of district budgets, areas and levels of service, and district organizational structures, but not on any detailed analyses. An in-depth analysis of services and final decisions on recommendations will occur over the next four years as service reviews are conducted.

INDEPENDENT SPECIAL DISTRICTS

BARDSDALE CEMETERY DISTRICT

General Manager: Leonard Boyton
Address: 1698 South Sespe Street

would Involve**

LAFCO: Potential consolidation with the Piru Cemetery District

SUMMARY

The District serves the City of Fillmore and surrounding area. It owns and operates the Bardsdale Cemetery that is approximately 12 acres in size. The District offers burial sites mainly to residents or property owners within the district. Non-residents may be buried at the cemetery if family members are buried there, and indigent burials are also provided.

SPHERE OF INFLUENCE

The sphere follows the existing District boundary.

1972 Special District Study Recommendation

The study recommended that the LAFCO staff, in cooperation with the Districts, prepare a feasibility report on the subject of consolidation with the Piru Cemetery District. This study was not completed.

1985 Special District Study Recommendation

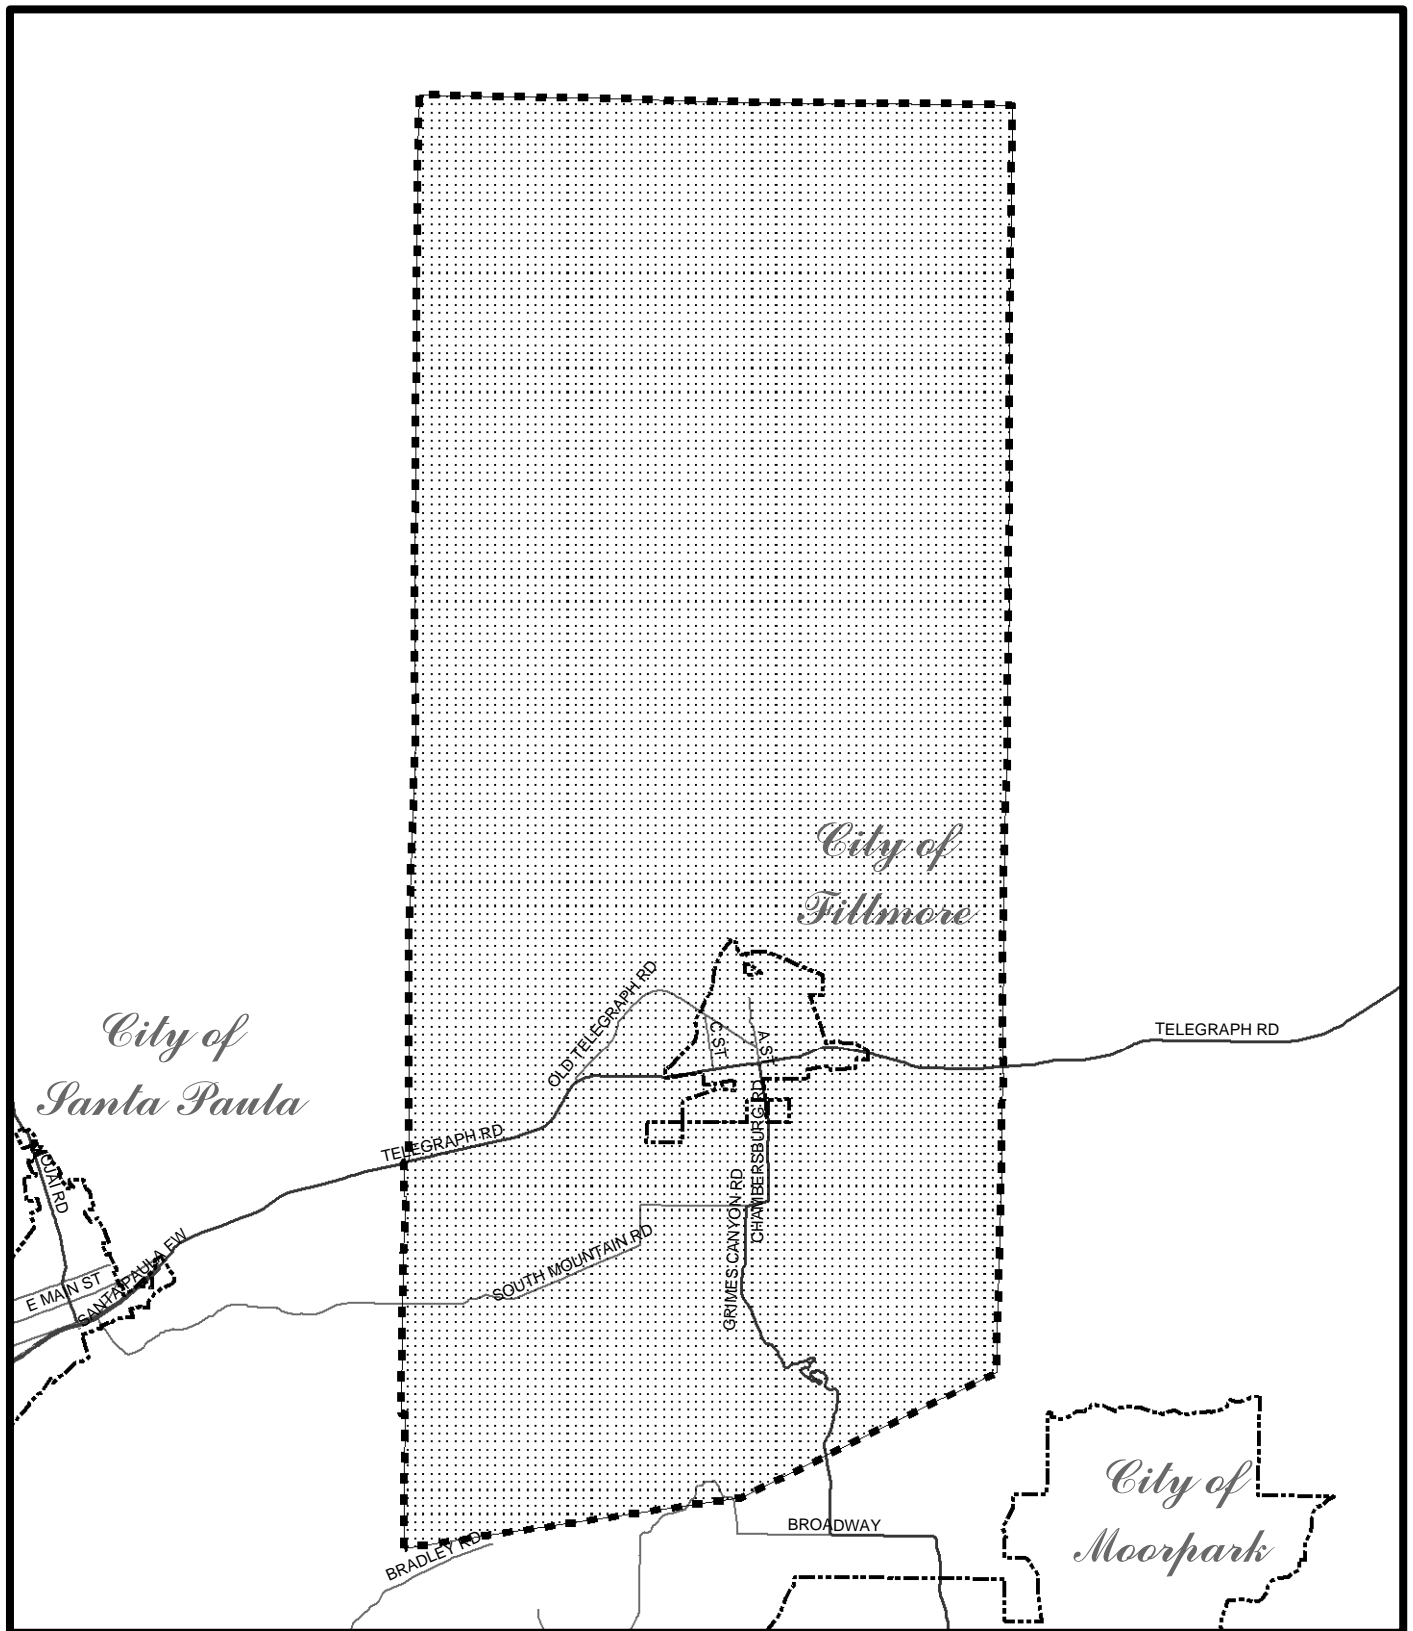

The District, in conjunction with LAFCO staff, should evaluate future consolidation.

1993 Special District Study Recommendations

The Study recommended eventual consolidation of the District with the neighboring Piru Cemetery District.

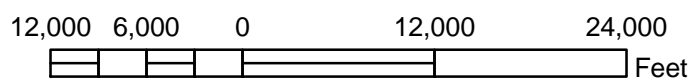

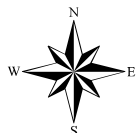

2001 Special District Study Recommendations

This district is functioning, but consolidation with the failing Piru Cemetery District, that is contiguous to the east, should be considered as a part of the overall service review process per Government Code Section 56430. A consolidated District may be able to perform maintenance and burial functions more economically than by having two separate operations.

Contract with City of Los Angeles for paramedic services.
Contract with Ventura County Sheriff for traffic patrol.

Future Plans that would Involve LAFCO:

LAFCO would have to approve the use of any other services before the District can use funds for added functions such as street maintenance or reconstruction.

SUMMARY

The District was formed in 1984 to provide a local public agency for Bell Canyon that is a residential community adjacent to the Los Angeles County boundary. It is authorized to provide a variety of services, including fire protection, recreation, water distribution, street lighting, and sanitary sewer service.

When the District was formed, the area was detached from the Rancho Simi Recreation and Park District, thereby making property taxes available to the new district.

SPHERE OF INFLUENCE

The sphere follows the existing District boundary.

BELL CANYON COMMUNITY SERVICES DISTRICT

1972 Special District Study Recommendation

The District did not exist in 1972.

**Agreements with
Others to Provide
Services:**

Las Virgenes Joint Financing Authority and Pleasant Valley
County Water District

**Future Plans that
would Involve
LAFCO:**

Future annexations as applications are submitted.

SUMMARY

The District is engaged in the wholesale distribution of potable water. It serves approximately 543,000 customers through retail water providers. It is a member agency of the Metropolitan Water District of Southern California.

The majority of the County population, including the cities of Camarillo, Moorpark, Oxnard, Simi Valley, and Thousand Oaks, is included with the District

SPHERE OF INFLUENCE

The sphere follows the existing District boundaries except in the Camarillo and Oxnard areas where it approximates the cities Sphere of Influence.

1972 Special District Study Recommendation

The study made no recommendation.

1985 Special District Study Recommendation

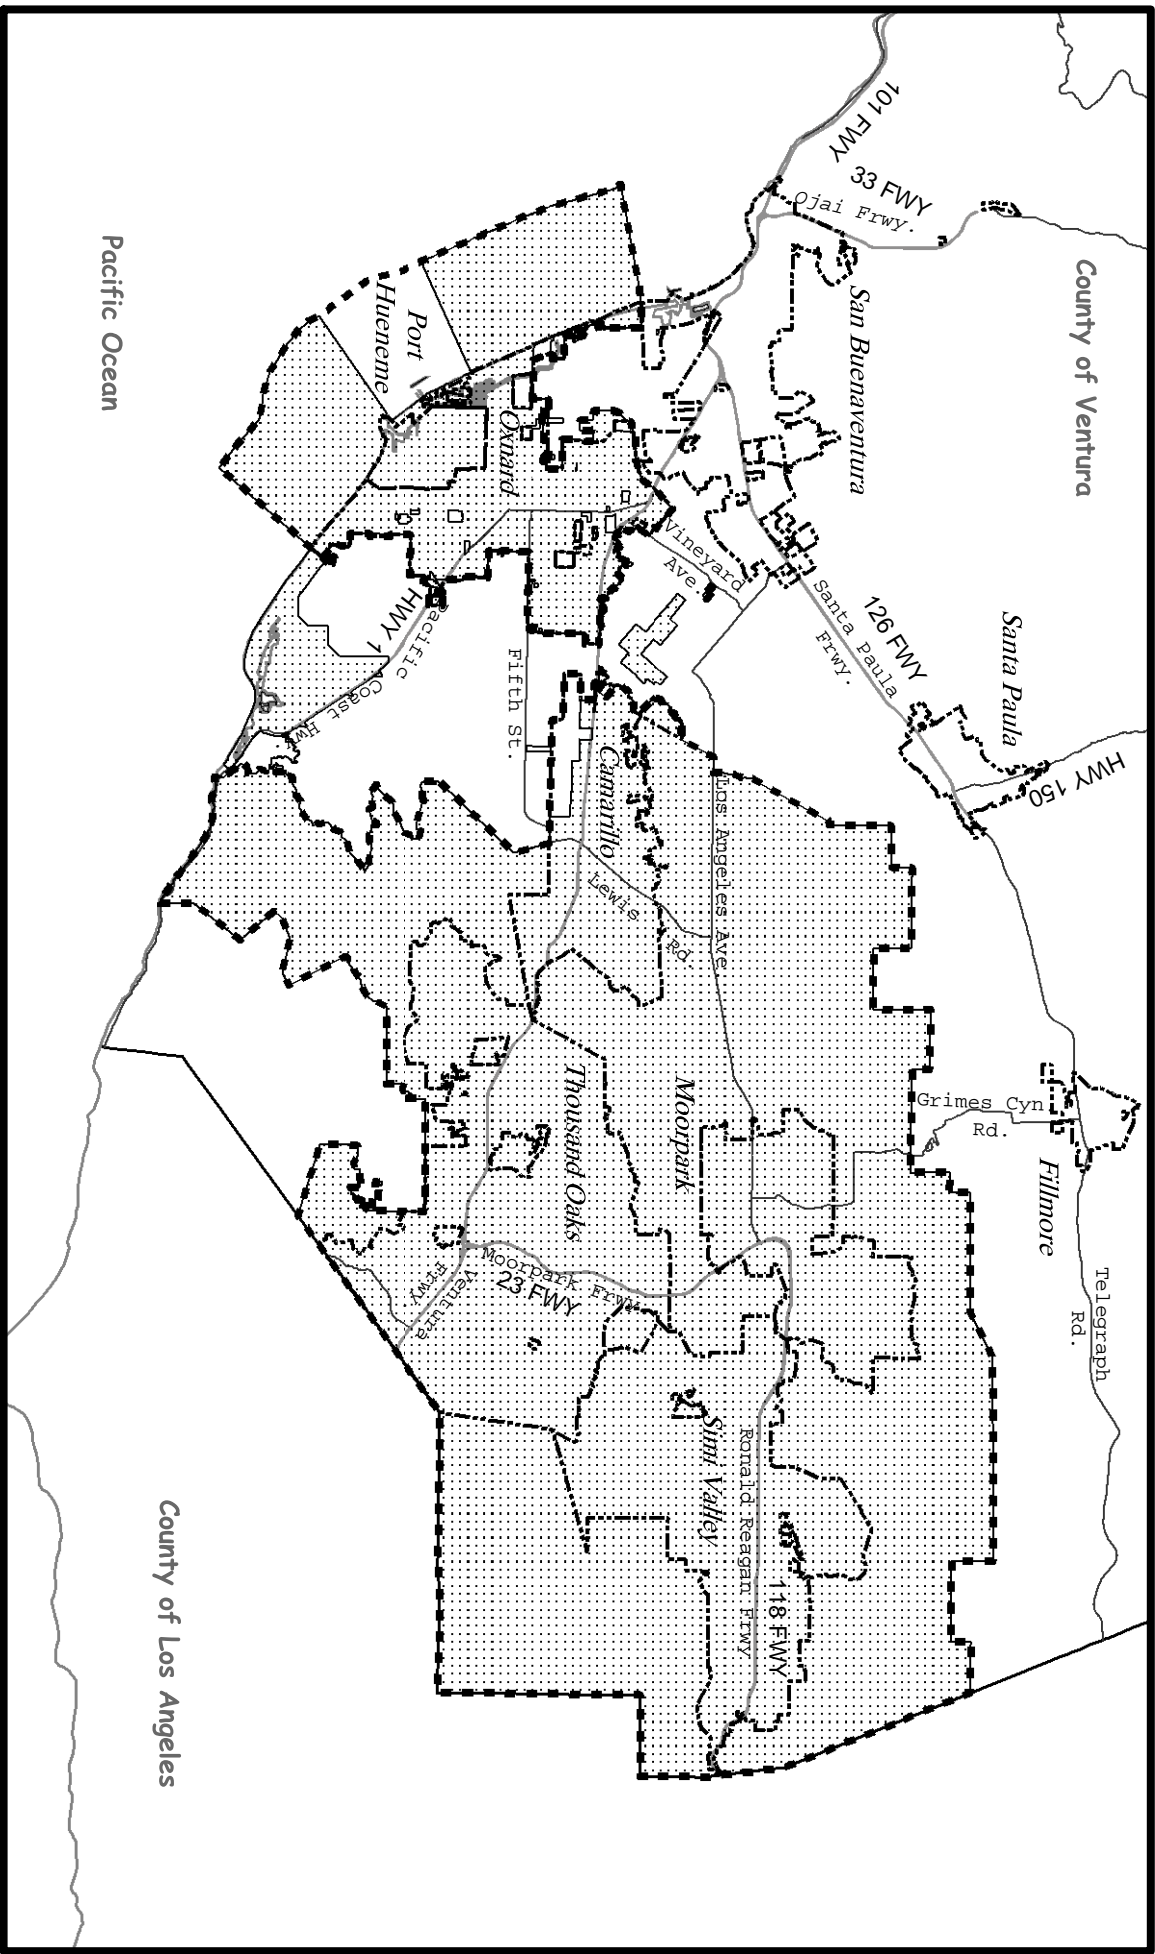

The study made no recommendation.

1993 Special District Study Recommendations

The study made no recommendations.

2001 Special District Study Recommendation

As a part of the overall service review process per Government Code Section 56430, considerations should be given to having small retail water districts that overlap the Calleguas Municipal Water District be consolidated with the District. The District's spheres of influence should coincide with the spheres of influence of the cities within the District and existing "island" areas should be annexed to the District. The District should work with Metropolitan Water District to ensure that costs and fees associated with annexation only become applicable and payable at such time that water connections occur.

**Future Plans that
would Involve**

LAFCO: none

SUMMARY

The District was originally formed in 1969 as the Pleasant Valley Hospital District. The original purpose of the District was to construct and operate an acute care facility in the Camarillo area. In 1983, the District transferred the acute care facility to a non-profit corporation and was renamed and restructured as the Camarillo Health Care District.

The District offers its residents numerous health care programs at a level that is unique and not provided elsewhere in the County. The District has developed a variety of services that involve intergovernmental collaboration through a number of agreements as well as community-based alliances to create program opportunities and to share facilities, equipment, and transportation.

The District also offers services within its boundaries to others at an out of district rate.

In 2000, the District annexed approximately 650 acres of property that took in the newly formed California State University at Channel Islands.

SPHERE OF INFLUENCE

The sphere follows the District boundaries and also includes the Ponderosa Corridor, Sterling Hills, Knightsbridge, and Santa Rosa Valley areas.

1972 Special District Study Recommendation

The Study recommended that future annexations to the City of Camarillo include concurrent annexation to the District where applicable. This recommendation was not followed.

1985 Special District Study Recommendation

The study recommended that the District be evaluated with respect to possible exchanges of its property tax allocation, in whole or in part, to other public service agencies in the Camarillo area that are heavily dependent upon property tax revenues. It is not known if such an evaluation ever occurred.

CAMARILLO HEALTH CARE DISTRICT

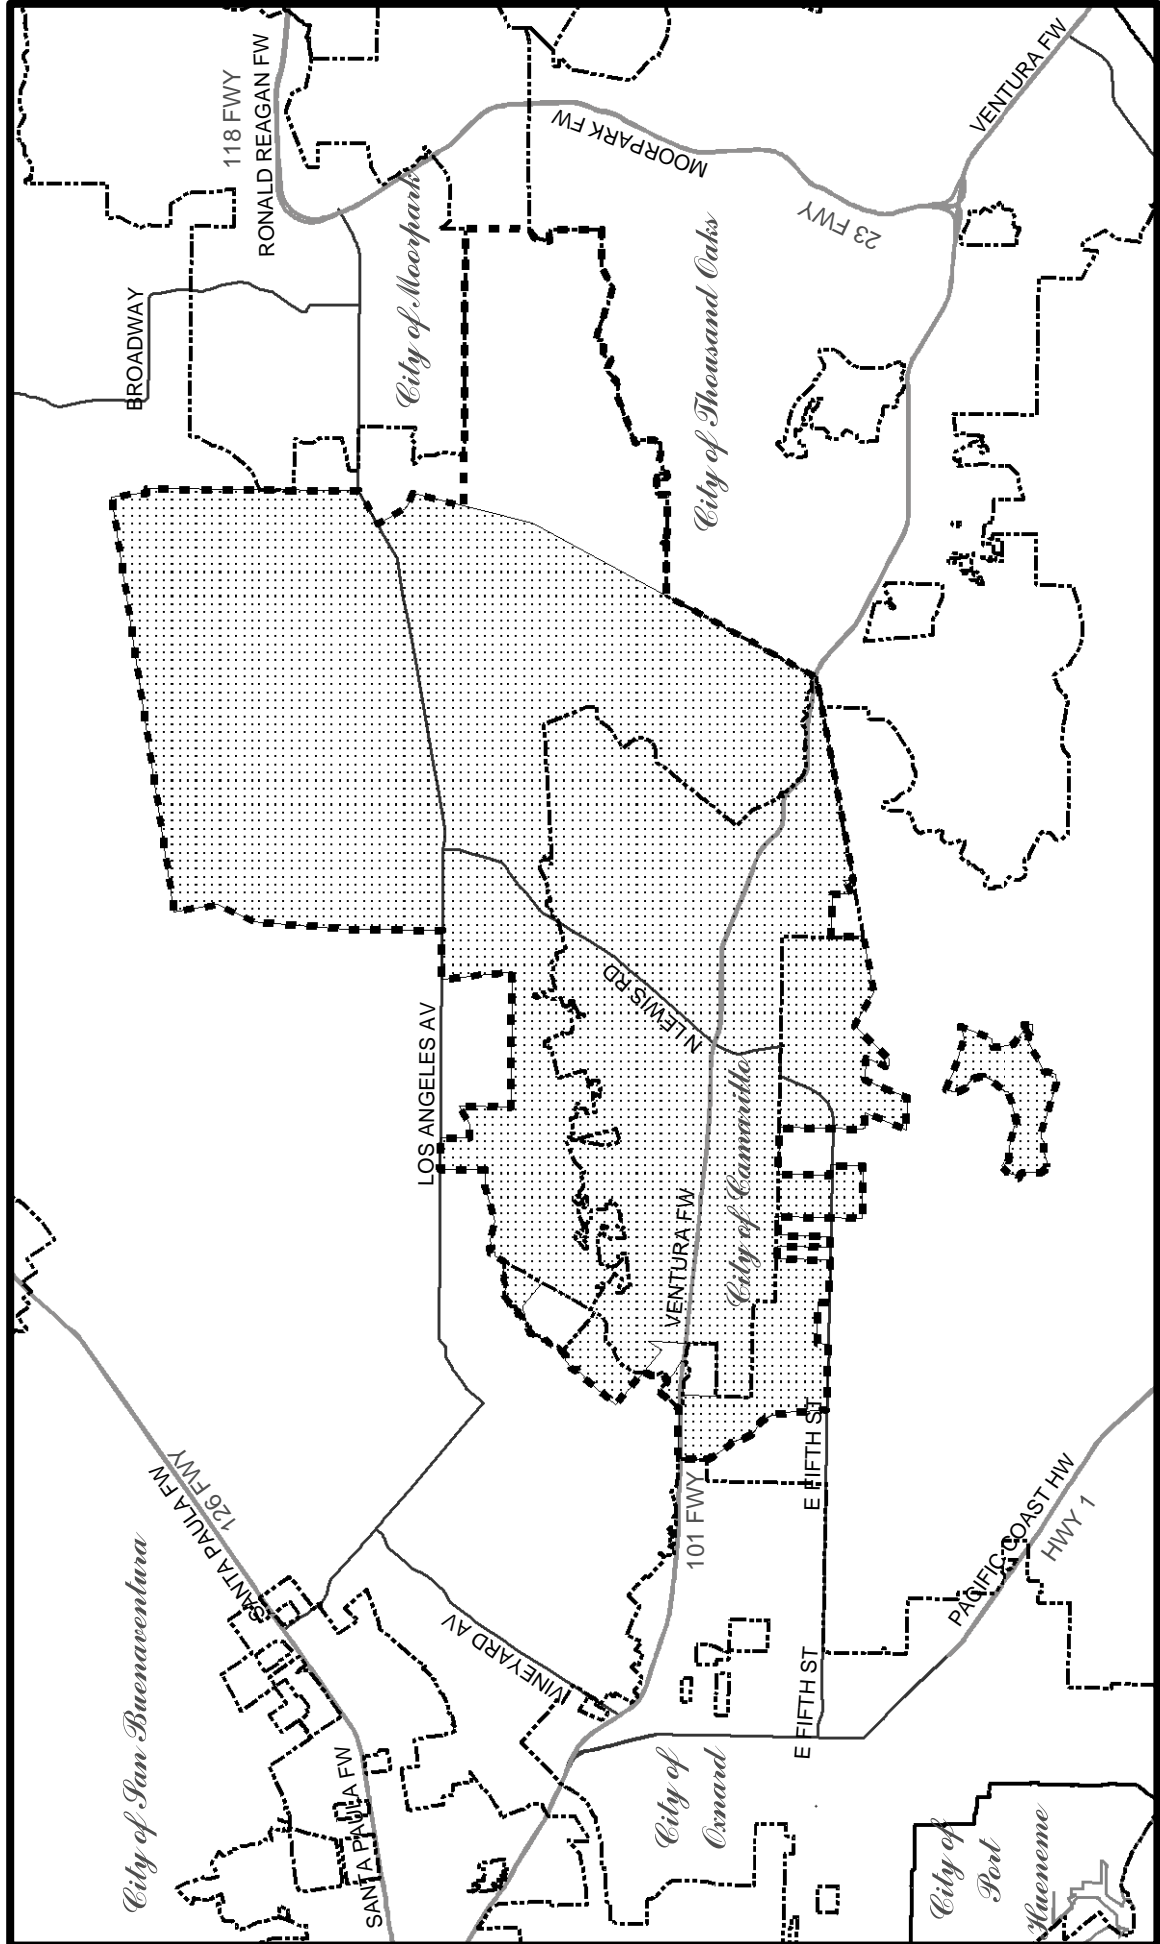

1993 Special District Study Recommendations

The study made no recommendations.

2001 Special District Study Recommendation

As part of the overall service review process per Government Code Section 56430, the services provided by this District should be carefully reviewed by LAFCO to ensure that they do not overlap with or duplicate health care services provided by the County in the Camarillo area. If services overlap or duplicate County services, a more detailed analysis should occur about the District's use of property tax revenues and whether such revenues should revert to the County for health care purposes.

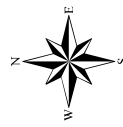

If the District is found to be providing unique and/or enhanced services, the service review and related sphere of influence process should consider having the District's sphere of influence be co-terminus with the sphere of influence of the City of Camarillo and having areas within the sphere of influence annexed to the district. An issue relating to annexation is whether or not additional areas can be served by the District without any additional property tax revenue.

Camarillo Health Care District

Prepared by PWA - Mapping Division

Warning: This map was created by the Ventura County Computer-Aided Mapping System (CAMS), which is designed and operated solely for the convenience of the county and related public agencies. The county does not warrant the accuracy of this map and no decision involving a risk of economic loss or physical injury should be made in relation thereon.

Services:**

none

**Future Plans that
would Involve
LAFCO:**

Construction of a recycled water project to reduce groundwater overdraft, reduce use of imported water, and improve supply reliability will require an update of the 1990 Master Plan for water and wastewater requirements of the service area.

SUMMARY

The District distributes water to domestic, governmental, and agricultural customers in the Tierra Rejada Valley, Santa Rosa Valley and the northeastern portion of Pleasant Valley. The service area includes the City of Camarillo east of Calleguas Creek and portions of the cities of Moorpark and Thousand Oaks.

The District collects and treats sewage generated within a portion of the City of Camarillo. It's service area, east of Calleguas Creek and north of Highway 101, reflects a 1966 service area agreement between the District and the Camarillo Sanitary District.

The District provides water and sewer service to the California State University, Channel Islands and surrounding State property.

SPHERE OF INFLUENCE

The sphere follows the existing District boundary.

1972 Special District Study Recommendation

The study recommended that the District and Camarillo Sanitary District investigate the feasibility of having Camarillo Sanitary District responsible for all sanitation service within the City of Camarillo.

The affected Districts discussed the Commissions proposal and Camrosa Water District determined that it would no be in its best interests to proceed further with the matter.

CAMROSA WATER DISTRICT

1985 Special District Study Recommendation

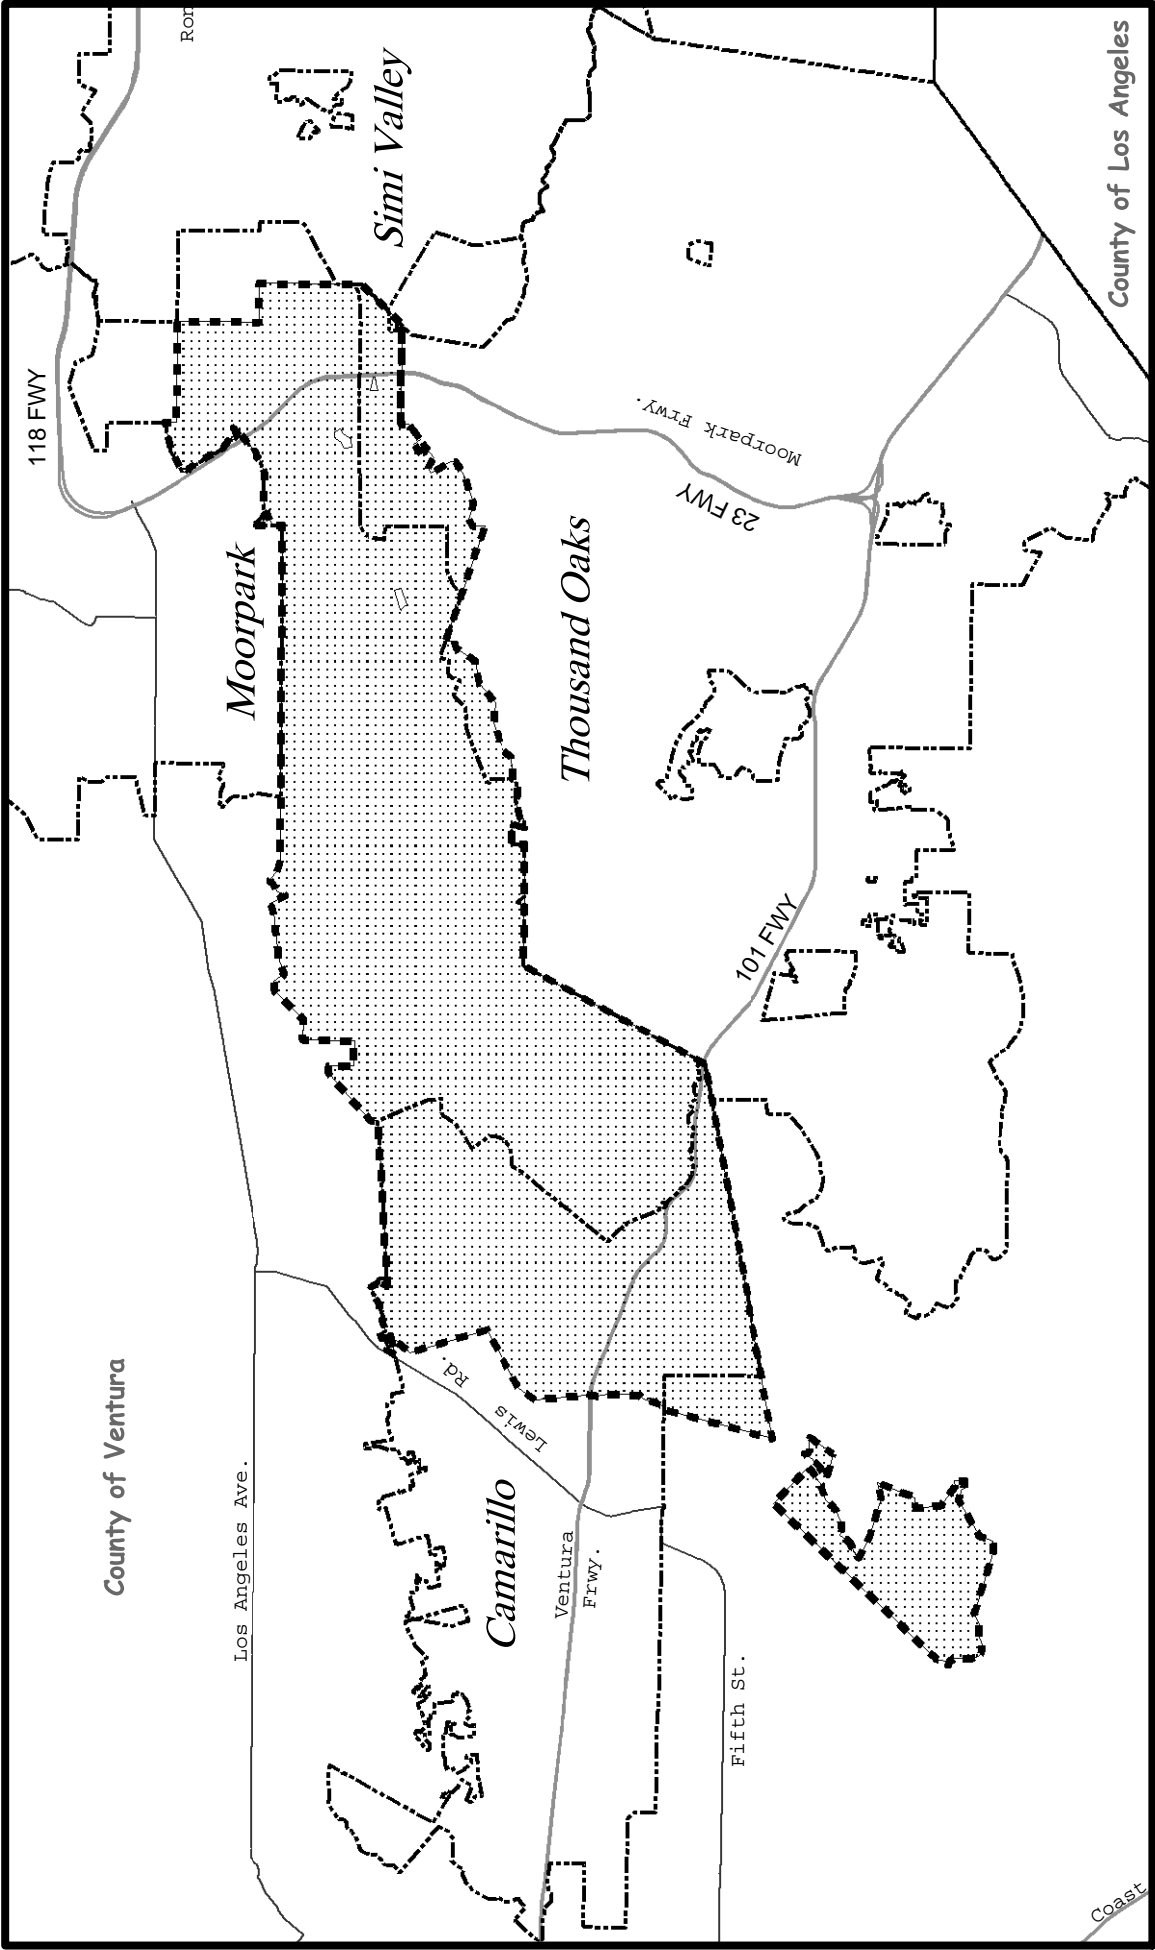

The study made no recommendations.

1993 Special District Study Recommendations

The study made no recommendations.

2001 Special District Study Recommendations

As part of the overall service review process per Government Code Section 56430, consideration should be given to the planned update of the 1990 Master Plan for water and wastewater requirements in the service area. A part of the review should investigate the feasibility of having the Camarillo Sanitary District responsible for all wastewater service within the sphere of influence of the City of Camarillo.

SUMMARY

The District is a wholesale and retail water agency that serves the Ventura River Valley, western part of the City of San Buenaventura and the North Coast areas. It operates and maintains major water diversion, storage, and distribution facilities.

The District also provides public recreation facilities at Lake Casitas.

SPHERE OF INFLUENCE

The sphere follows the existing District boundary.

1972 Special District Study Recommendation

The study recommended that the District appoint a representative to a study committee to evaluate unification of retail water service in the Ventura River Valley.

The District appointed a representative to the committee. There is no record of further action being taken.

1985 Special District Study Recommendation

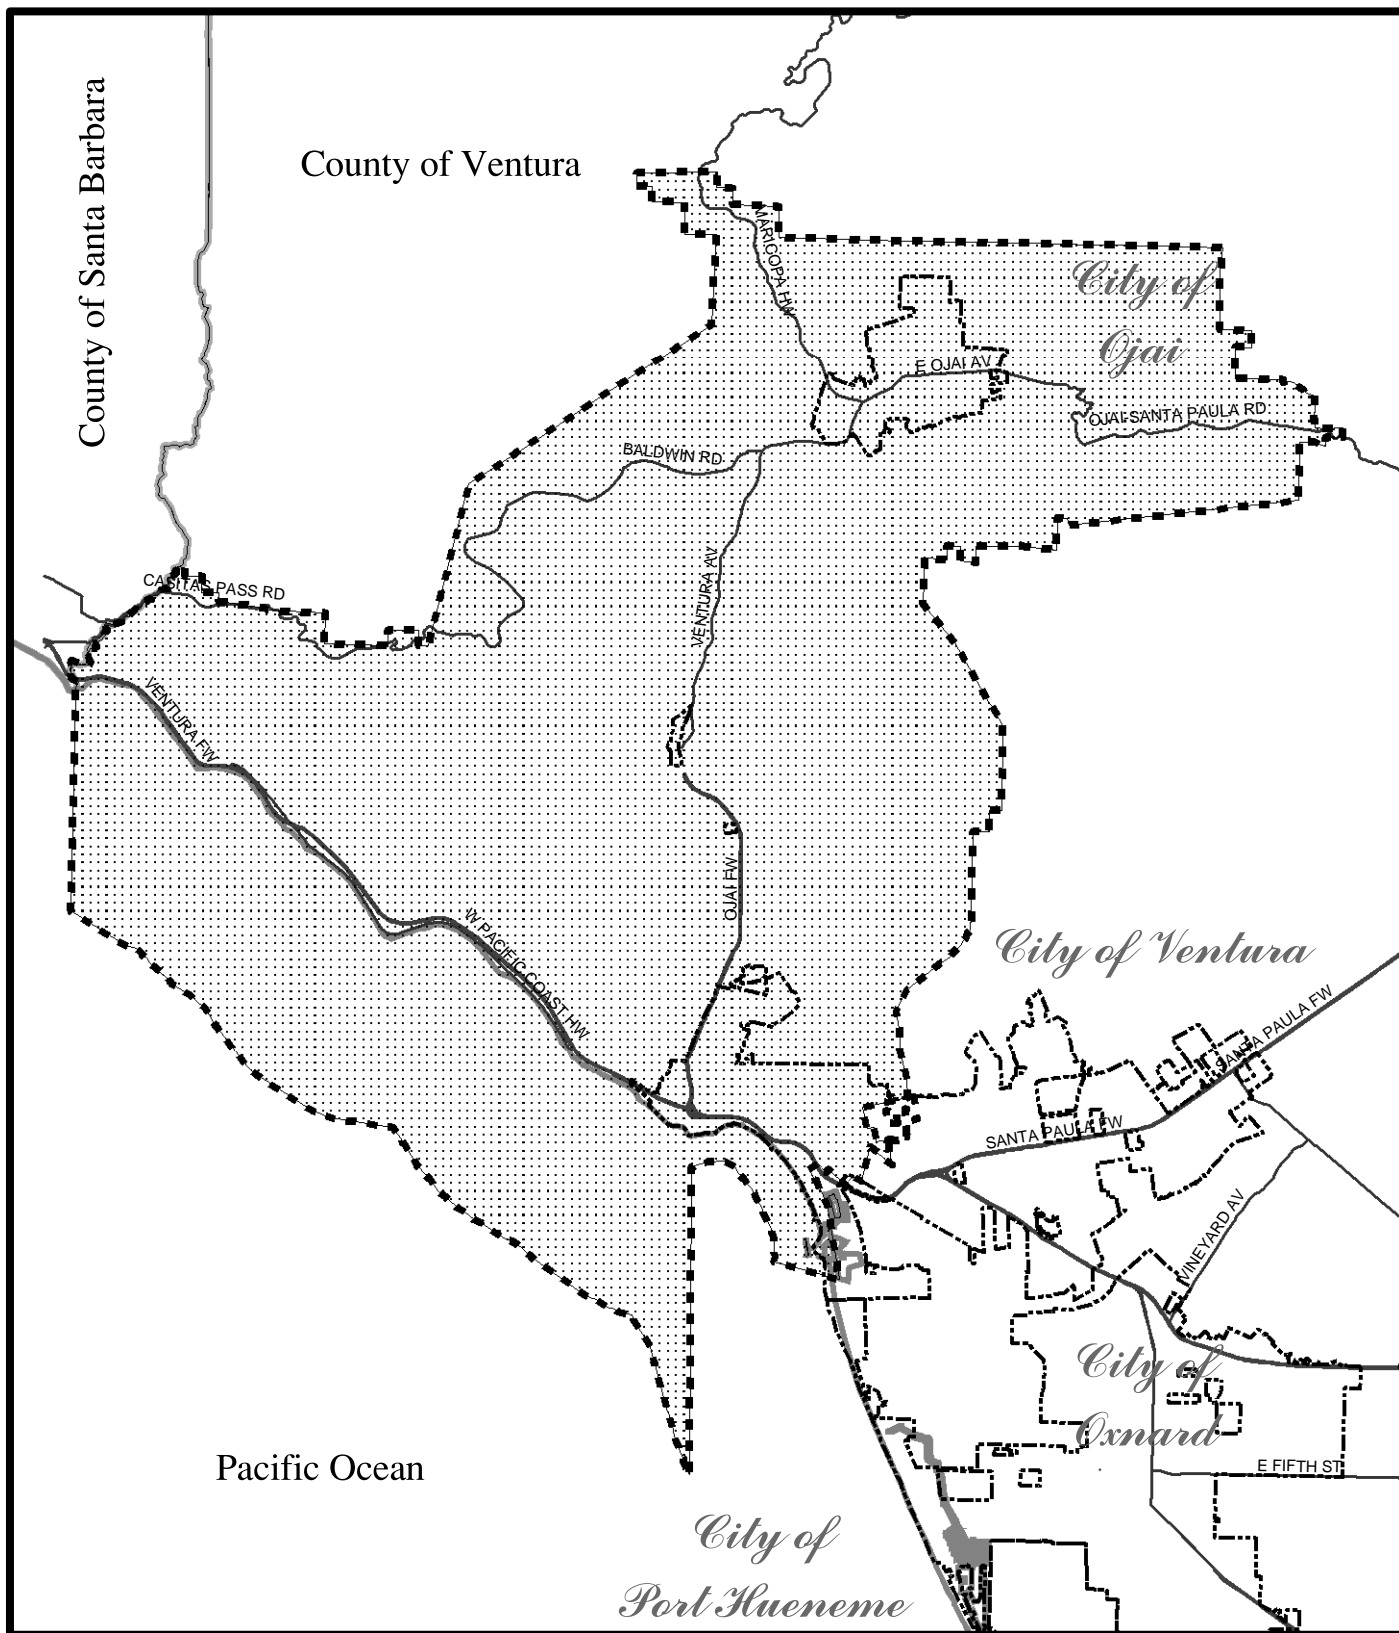

The study made no recommendations.

1993 Special District Study Recommendations

SUMMARY

The District provides water, sewage, and rubbish collection services in the unincorporated Silver Strand, Hollywood Beach, and Hollywood-by-the Sea. It was formed in 1982 as a successor to the Channel Islands County Water District.

Under contract it also provides water and/or sewage services to portions of Channel Islands Harbor in the City of Oxnard.

The District is authorized to provide a variety of services, including police and fire protection, street improvements and maintenance, street lighting and undergrounding of utilities.

SPHERE OF INFLUENCE

The sphere follows the existing District boundaries and also includes a portion of the City of Oxnard where the District provides water or sewer service. The sphere recognizes the special relationship that exists between the District and areas within the Channel Islands Harbor.

As provided for in the Community Services District Law, these unincorporated areas can be annexed to the District only with the consent of the Oxnard City Council.

1972 Special District Study Recommendation

The District did not exist in 1972.

LAFCO: none

SUMMARY

The District includes the City of Thousand Oaks as well as the adjacent unincorporated areas of Lake Sherwood and Lynn Ranch. At present, over 80% of the District's population and land are within the city.

The District has developed a variety of services that involve intergovernmental collaboration through a number of agreements as well as community-based alliances to create program opportunities, the park and facility infrastructure, and natural resource protection.

SPHERE OF INFLUENCE

The sphere follows the existing the existing City of Thousand Oaks boundaries which includes the Lake Sherwood area.

1972 Special District Study Recommendation

The study recommended that:

1. Urban areas in the Conejo Valley, specifically the North Sunset Hills area, be annexed to the District.

The North Sunset Hills area has been annexed.

2. Future annexations to the City be accompanied by concurrent annexations to the District.

By policy, when lands be annexed to the city they are also annexed to the District.

CONEJO RECREATION AND PARKS DISTRICT

3. LAFCO consider adjusting the Thousand Oaks Area of Interest to include the Oak Park development located to the east.

The inclusion of the Oak Park area within the Thousand Oaks Area of Interest was studied by the City and the County. The City decided not to pursue this matter until the residents of the area expressed interest in being annexed to the City.

1985 Special District Study Recommendation

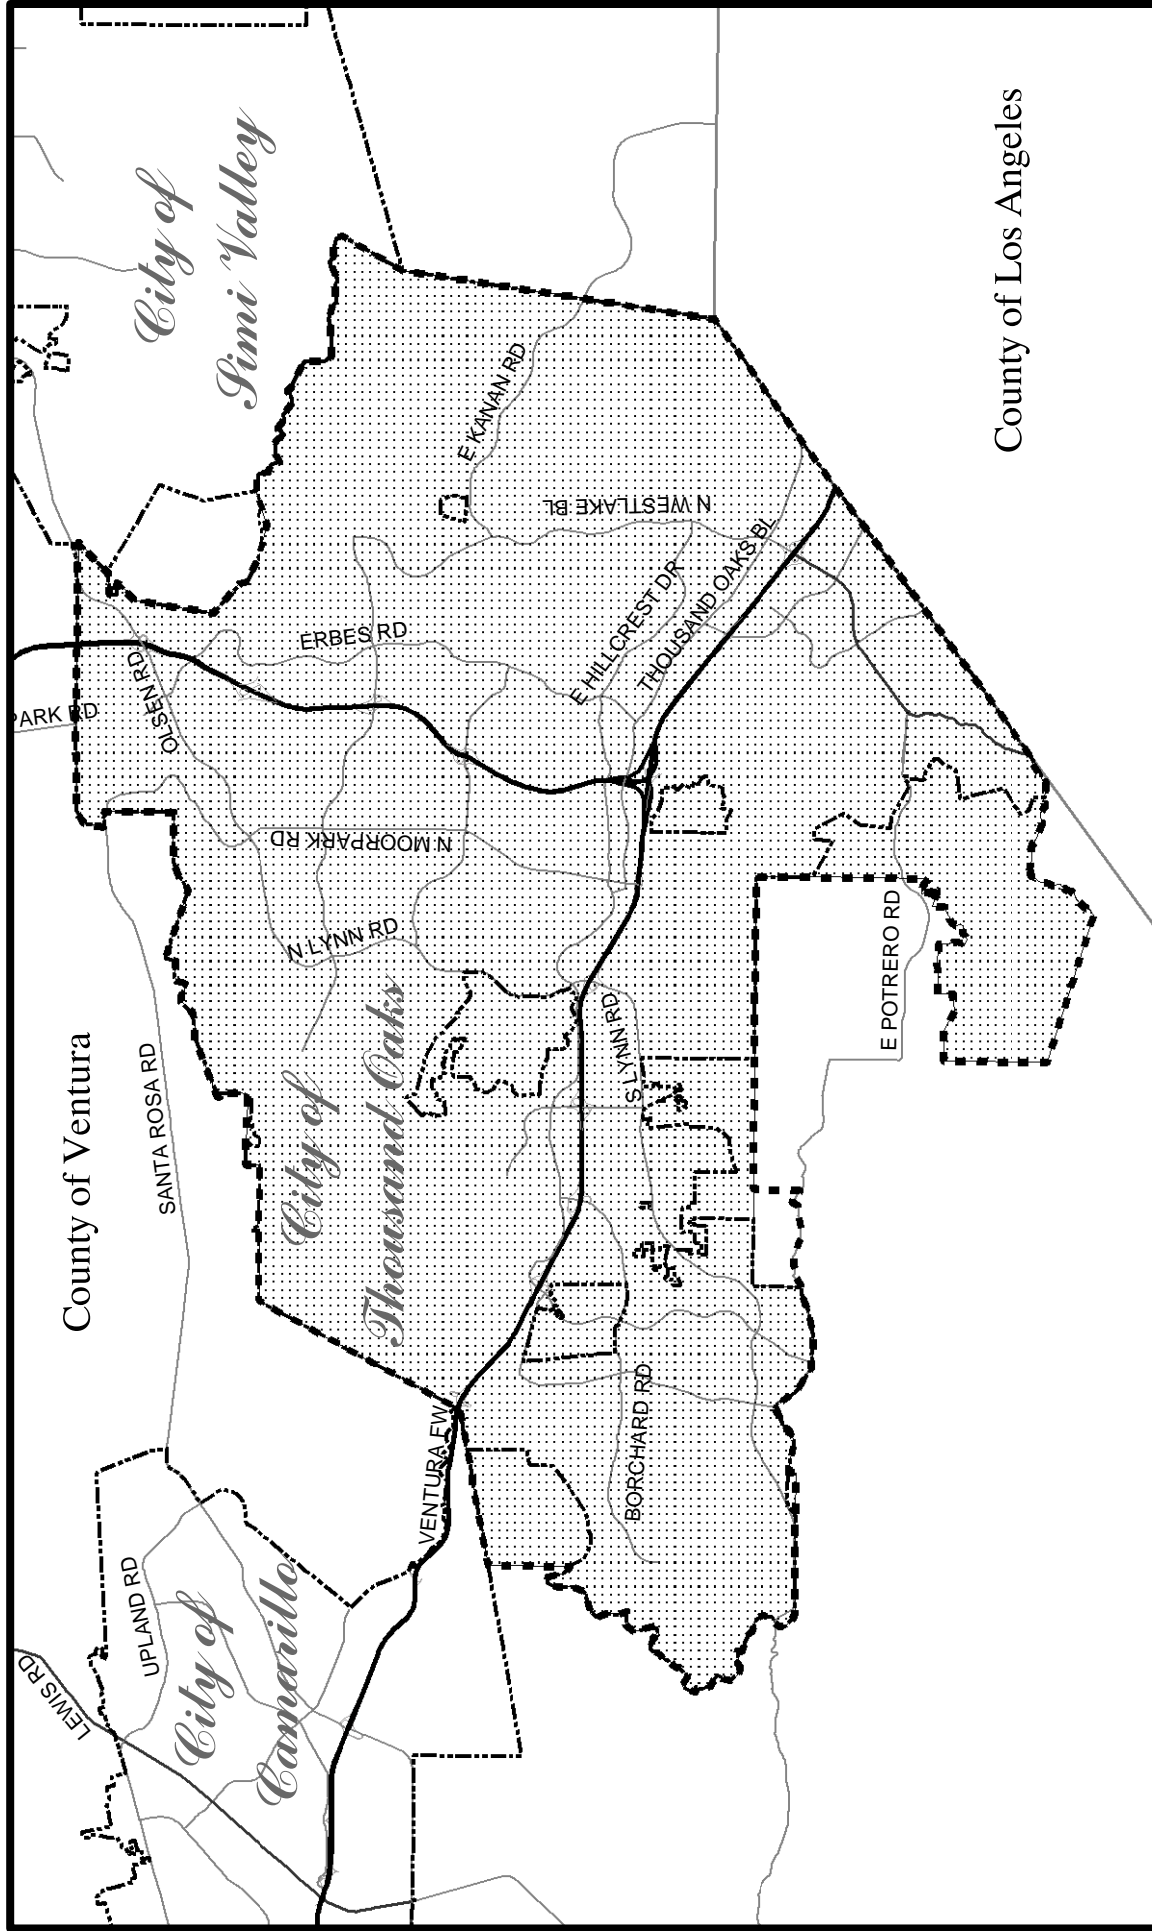

The study made no recommendations.

1993 Special District Study Recommendations

The study made no recommendations.

2001 Special District Study Recommendations

None, pending the service reviews by Government Code Section 56430.

SUMMARY

The cemetery is located within the City of Simi Valley. In June of 1995, the cemetery district changed its name with the State of California from Simi Valley Public Cemetery District to El Rancho Simi Cemetery District.

SPHERE OF INFLUENCE

The sphere follows the existing District boundary, except for the eastern Tierra Rejada Valley where it is slightly smaller and follows the City of Simi Valley boundaries.

By policy, at such time the City's sphere is amended, the District's sphere should be re-examined.

1972 Special District Study Recommendation

The study recommended that the District detach territory located in the Moorpark area and south of the Simi ridgeline. Those detachments have been completed.

1985 Special District Study Recommendation

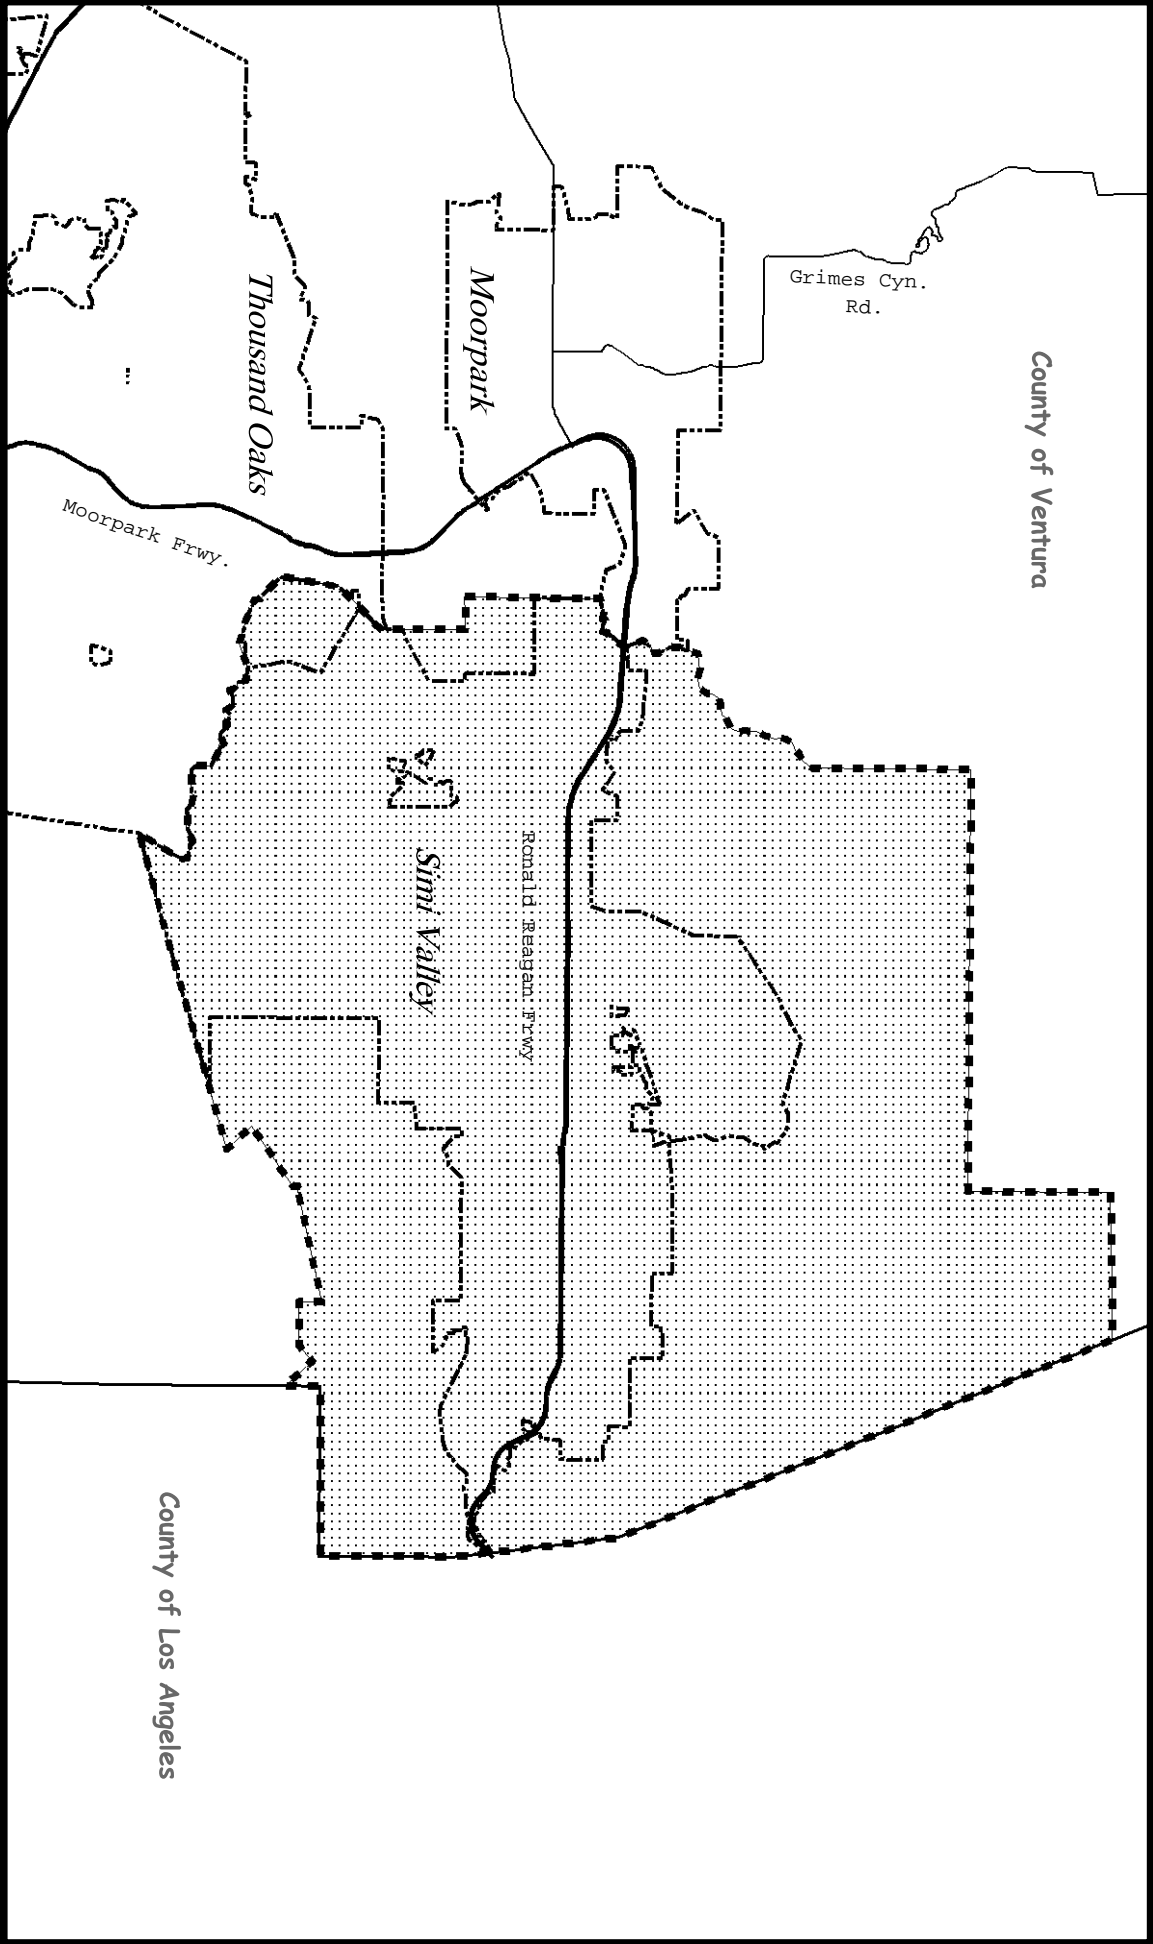

There were no recommendations made.

1993 Special District Study Recommendations

There were no recommendations made.

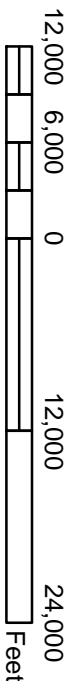

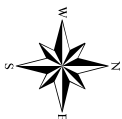

2001 Special District Study Recommendations

As part of the overall service review process per Government Code 56430, merger of this district with the City of Simi Valley should be considered.

SUMMARY

The District operates and maintains the memorial building, a public meeting hall in Fillmore that includes a general-purpose auditorium, dining room, kitchen, and adjacent youth building.

The District was formed and the building constructed in the memory of service men that gave their lives in the duty to their country. The land where the building is situated as well as much of the building itself was donated to the District. Voluntary labor was donated also and there is a good deal of community identity and association with the memorial building.

While District facilities are well used and appreciated by local residents, the City of Fillmore Recreation and Parks District formed under the Health and Safety Code could fulfill the same functions and provide expanded services as well.

Sphere of Influence

The sphere is the same as the District boundaries.

1972 Special District Study Recommendation

The Study recommended that the possibility be explored of converting the District into a Park and Recreation District. No action was taken.

1985 Special District Study Recommendation

The study made no recommendations.

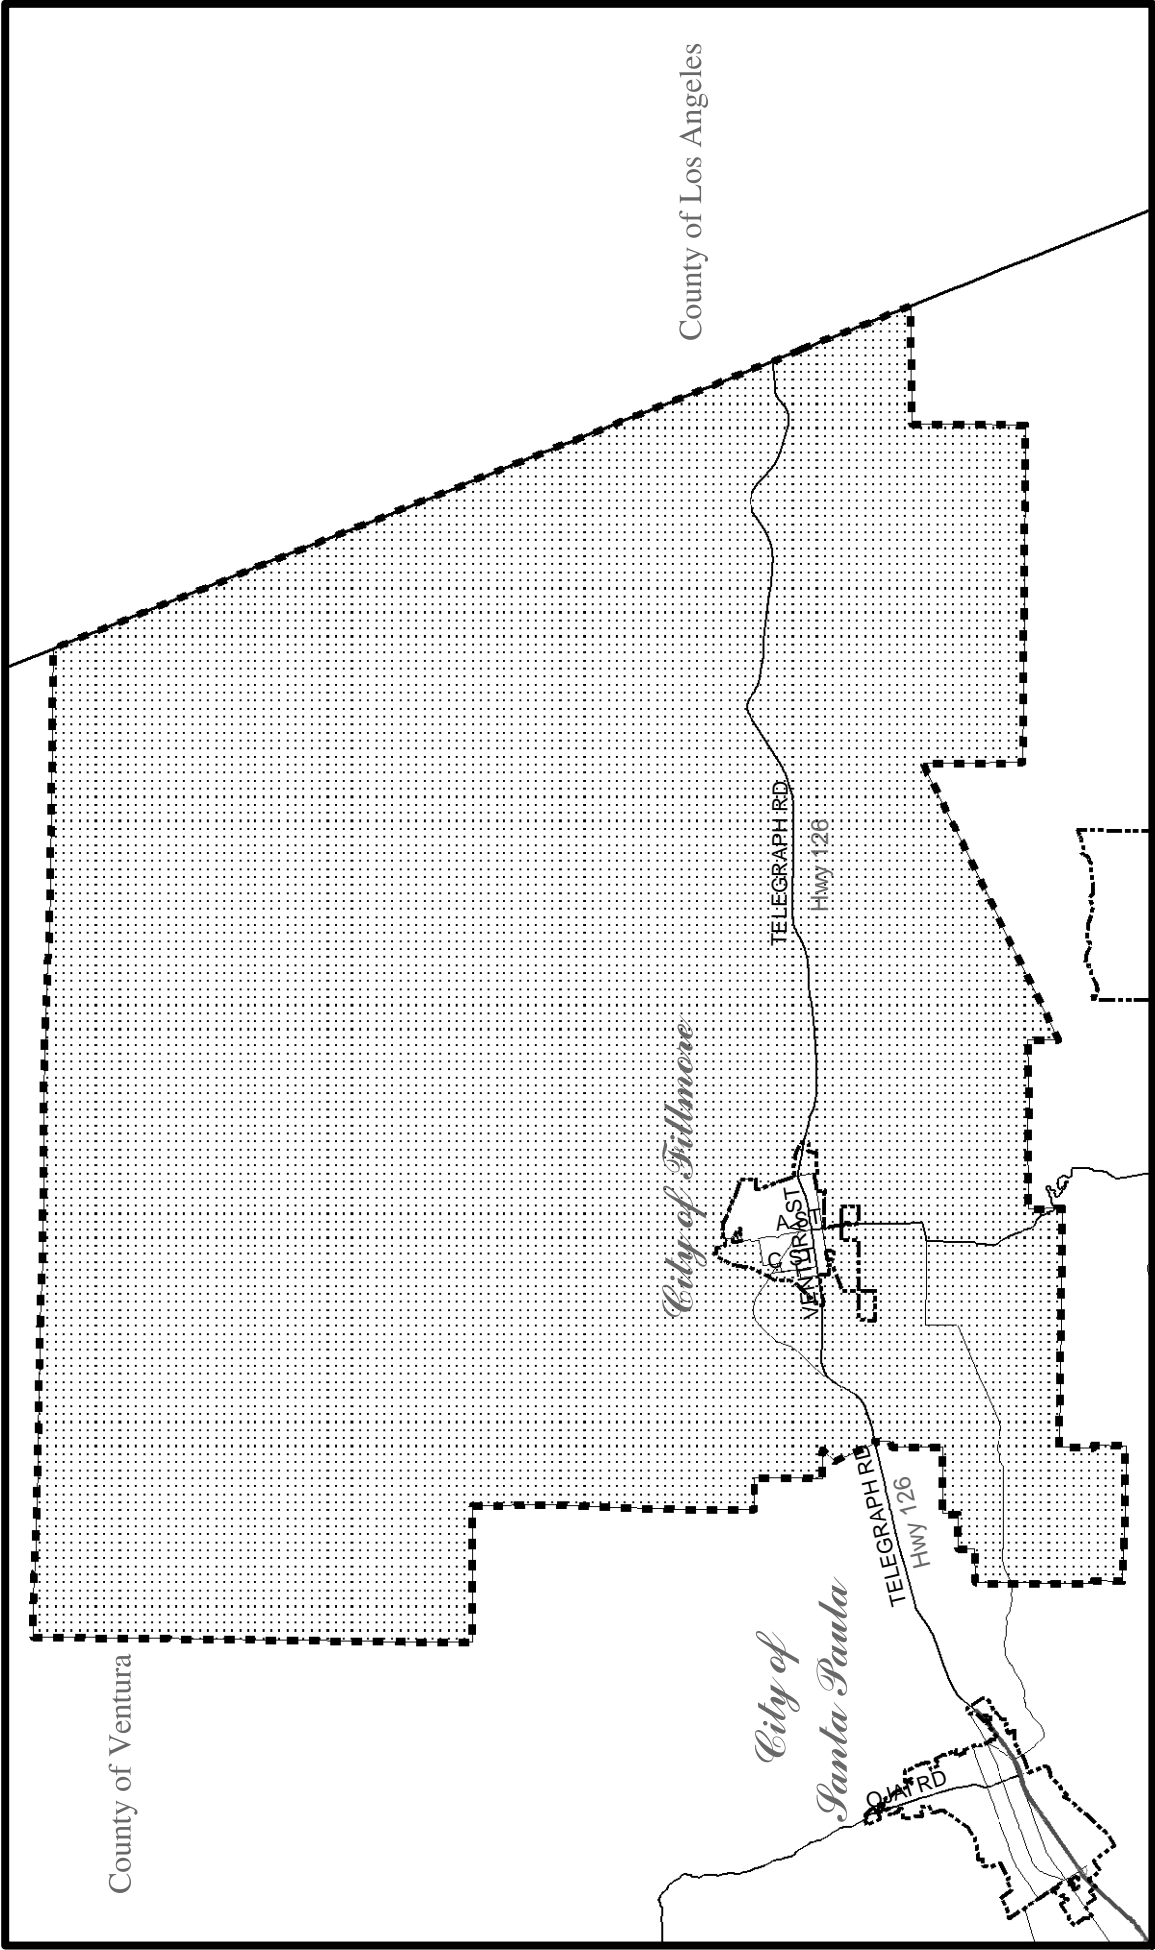

1993 Special District Study Recommendations

The City of Fillmore and the District negotiated a joint powers agreement to ensure the maintenance of the facility. No other recommendations were made.

FILLMORE-PIRU MEMORIAL DISTRICT

2001 Special District Study Recommendations

As part of the overall service review process per Government Code Section 56430 merger of this district with the City of Fillmore should be considered.

SUMMARY

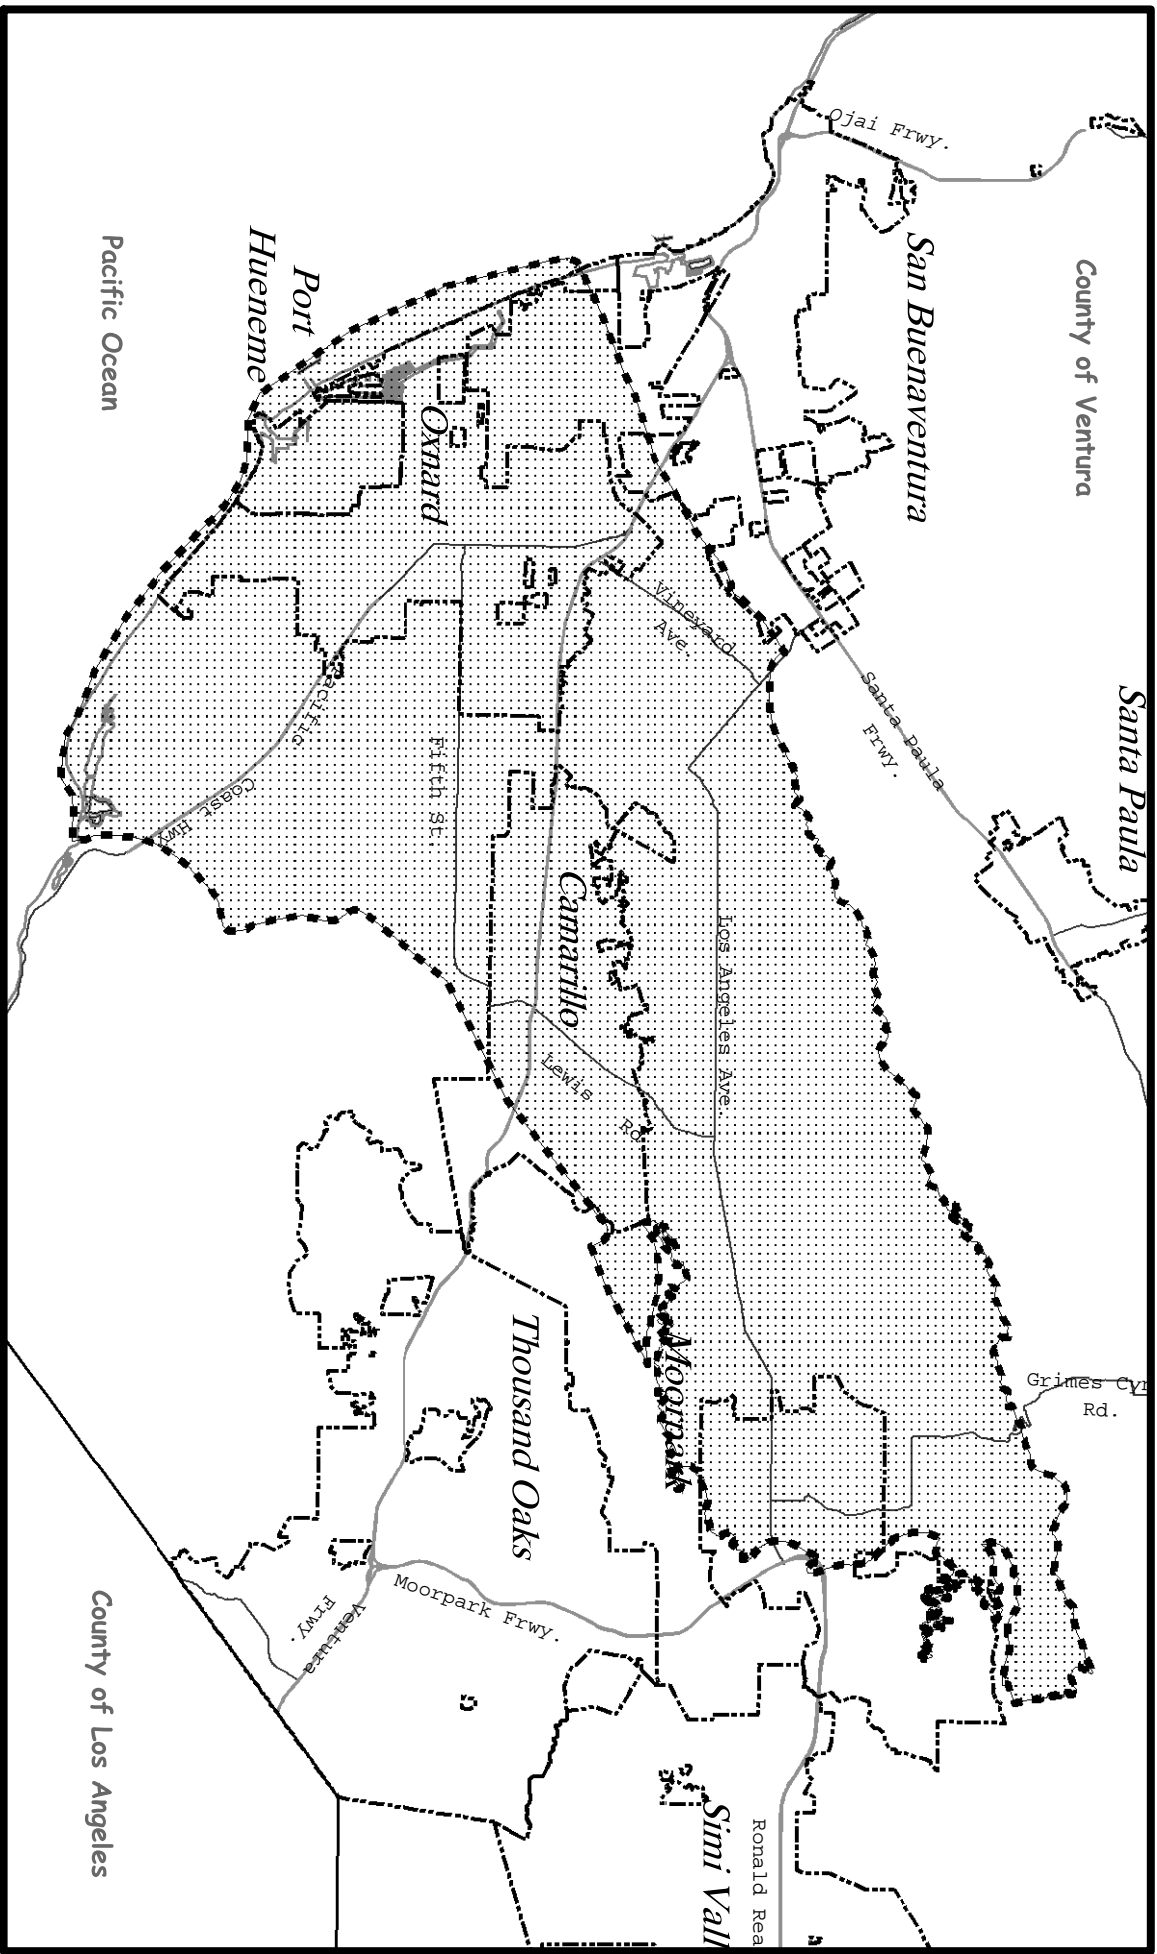

The agency was formed by State Assembly Bill 2995 to deal with seawater intrusion, enhance and protect groundwater supplies, and to bring aquifers to safe yield conditions by target date of 2010. The agency utilizes many ordinances and resolutions to regulate groundwater extractions from public and private wells. Sole source of income to agency is through extraction fees for management, with \$3.00/acre-foot the maximum allowed by law.

SPHERE OF INFLUENCE

The sphere of influence follows the existing District boundaries

LAFCO: none

SUMMARY

The District serves the rural area east of Lake Sherwood and south of the City of Thousand Oaks.

Previous LAFCO Special District Studies have indicated that this District was formed as a defensive measure to prevent annexation to the Calleguas Municipal Water District. In 1967 the California Court of Appeals held that the District had the powers to prevent a large landowner from detaching in order to annex to the Calleguas Municipal Water District. Later Court cases (Simi Valley Recreation and Park District vs. Board of Supervisors) indicated that Districts were unable to prevent landowners from detaching and annexing to another District.

While being established as a water district, this District does not produce or serve any water. The stated purpose of the District is to plan on how the residents might receive water in cases of prolonged drought.

SPHERE OF INFLUENCE

The sphere follows the existing District boundaries.

1972 Special District Study Recommendation

The study made no recommendations.

1985 Special District Study Recommendation

The study made no recommendations.

1993 Special District Study Recommendation

The study made no recommendations.

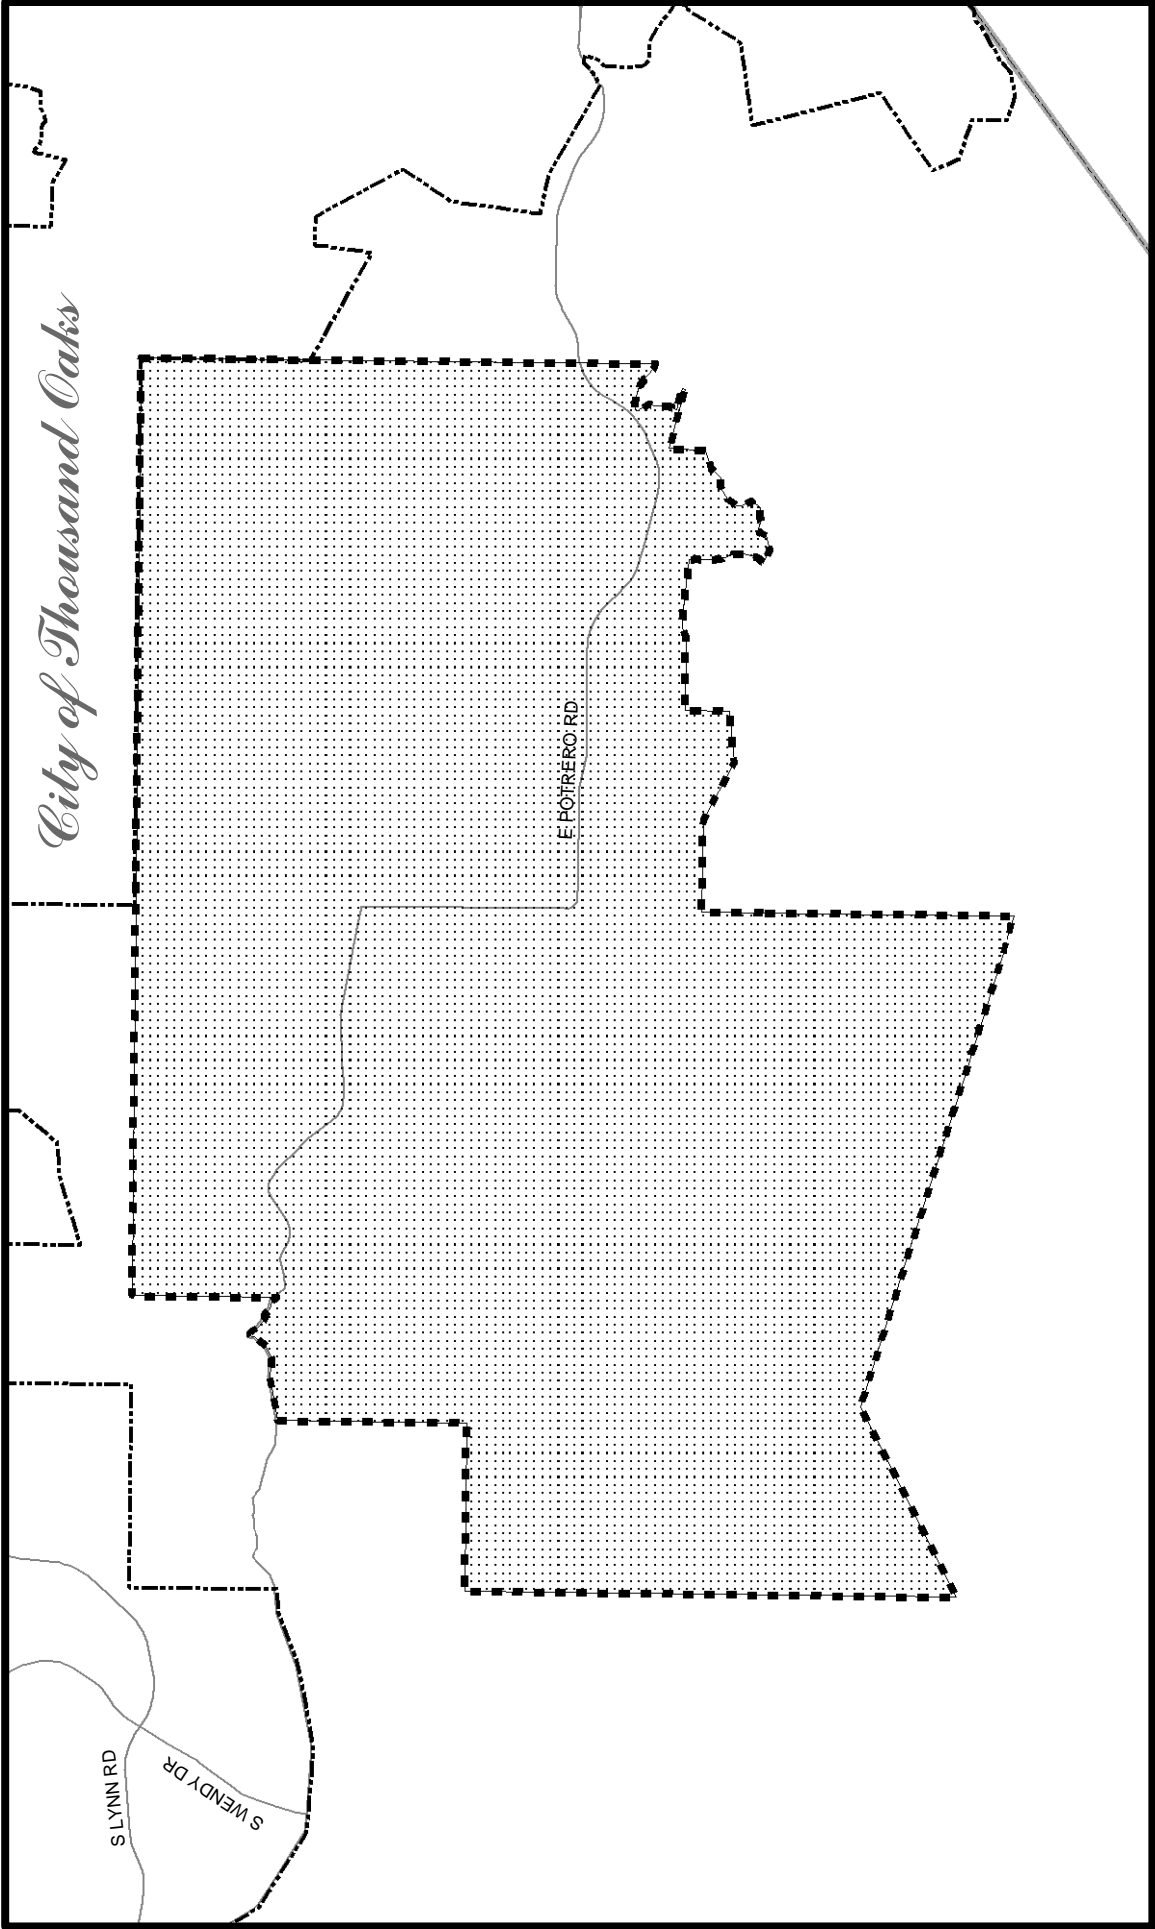

HIDDEN VALLEY MUNICIPAL WATER DISTRICT

2001 Special District Study Recommendations

This water district does not produce or distribute any water. The stated function is to plan for water supplies for the residents in the event of a prolonged drought. All residents of the District receive water from private wells.

This District raises concerns both operationally and financially. Operationally, the District does not provide any services. Financially, the adopted budget exceeds projected expenditures. The current property tax received by the District is about \$6,000 annually. The District's reserves are over \$250,000 and rising each year for no apparent purpose.

As part of the overall review process per Government Code Section 56430 dissolution of this district should be considered. If the district is to continue, action should be taken to reduce the property tax assessments to a level that reflects the District's expenditures.

SUMMARY

The District was formed from the Ojai Municipal Water Company in 1949. It operates and maintains a retail water system for the community of Meiners Oaks. Water is obtained from District wells. Emergency stand-by services are available from the Casitas Municipal Water District.

The District and the adjacent Ventura River County Water District cooperate through and informal agreement by which labor and materials to perform emergency maintenance functions would be shared.

SPHERE OF INFLUENCE

The sphere follows the existing District boundary.

1972 Special District Study Recommendation

The study recommended that the District appoint a representative to a study committee to evaluate unification of retail water service in the Ventura River Valley.

The District appointed a representative to the committee. There is no record of further action being taken.

1985 Special District Study Recommendation

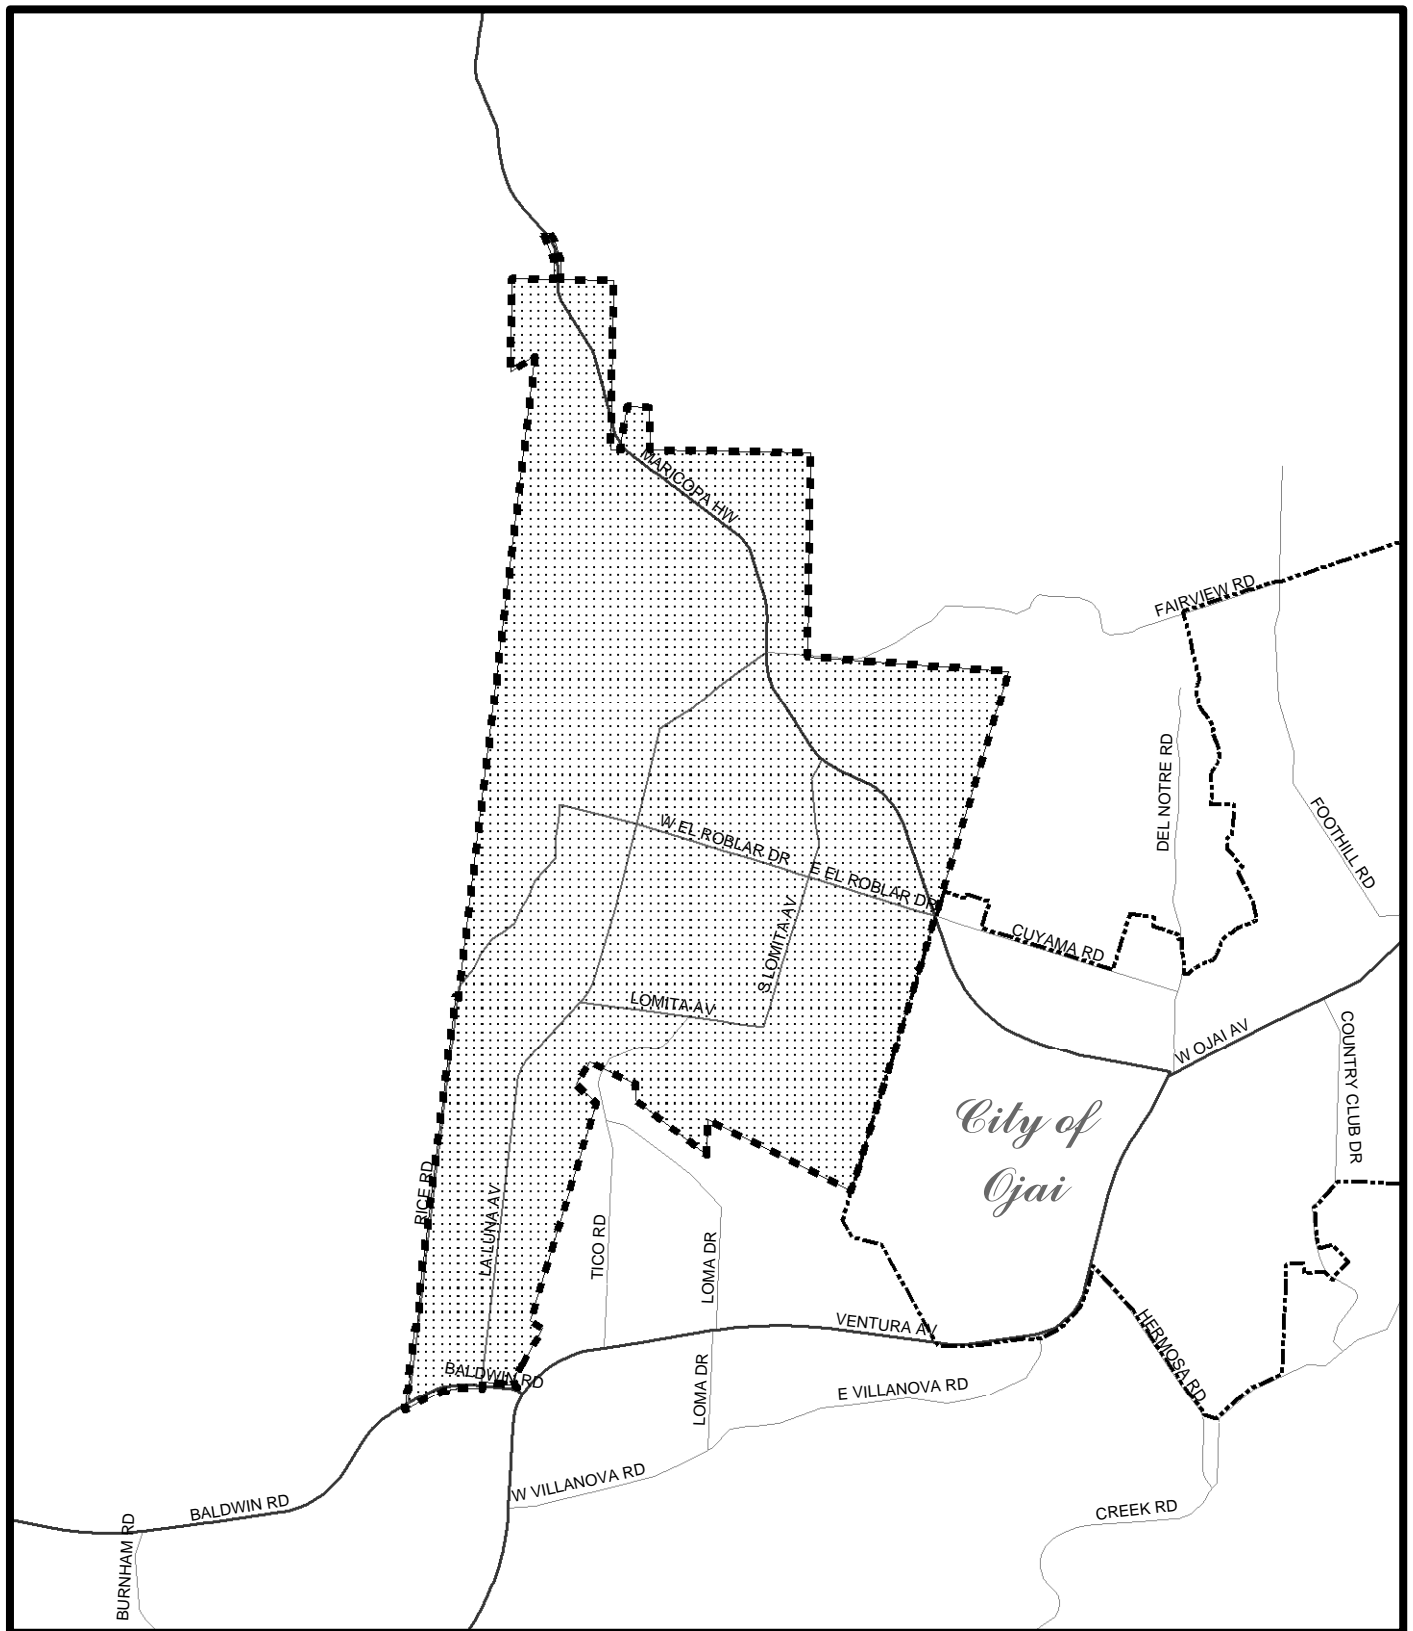

The study made no recommendations.

1993 Special District Study Recommendations

The study made no recommendations.

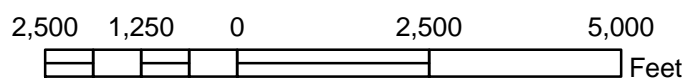

2001 Special District Study Recommendations

As a part of the overall service review process per Government Code Section 56430, the feasibility of consolidating this district with either the Ventura River County Water District or Casitas Municipal Water District should be considered.

The District collects and treats sewage for the Montalvo area. The majority of the District is within the City of San Buenaventura; the remainder is unincorporated.

The District's bonds were retired in 1991 through sewer service charges. In the past, annexations to the City had the effect of eroding the District service area and its ability to repay its bonds since a standard condition of development was that the City would provide sewer service.

To resolve the conflict over this issue, the City and the District, with LAFCO participating as a mediator, entered into a "Service Area Agreement." The Agreement provides that any unincorporated area that is annexed in the City of Ventura, and within the boundaries of the Montalvo Municipal Improvement District will continue to be served by the District.

The District has also entered into an additional Service Area Agreement with the City of Ventura, whereby the District serves the area of the City of Ventura known as the Leland Street, or Automobile Center area. The District provides sewer sanitation services for that area, however, the City of Ventura retains billing responsibilities for the service.

Sphere of Influence

The sphere is based upon the service area agreement.

1972 Special District Study Recommendation

The Study requested that the District, the City and the Ventura Regional Sanitation District prepare a feasibility report on the City assuming responsibility for District facilities. No action was ever taken.

1985 Special District Study Recommendation

The study made no recommendations.

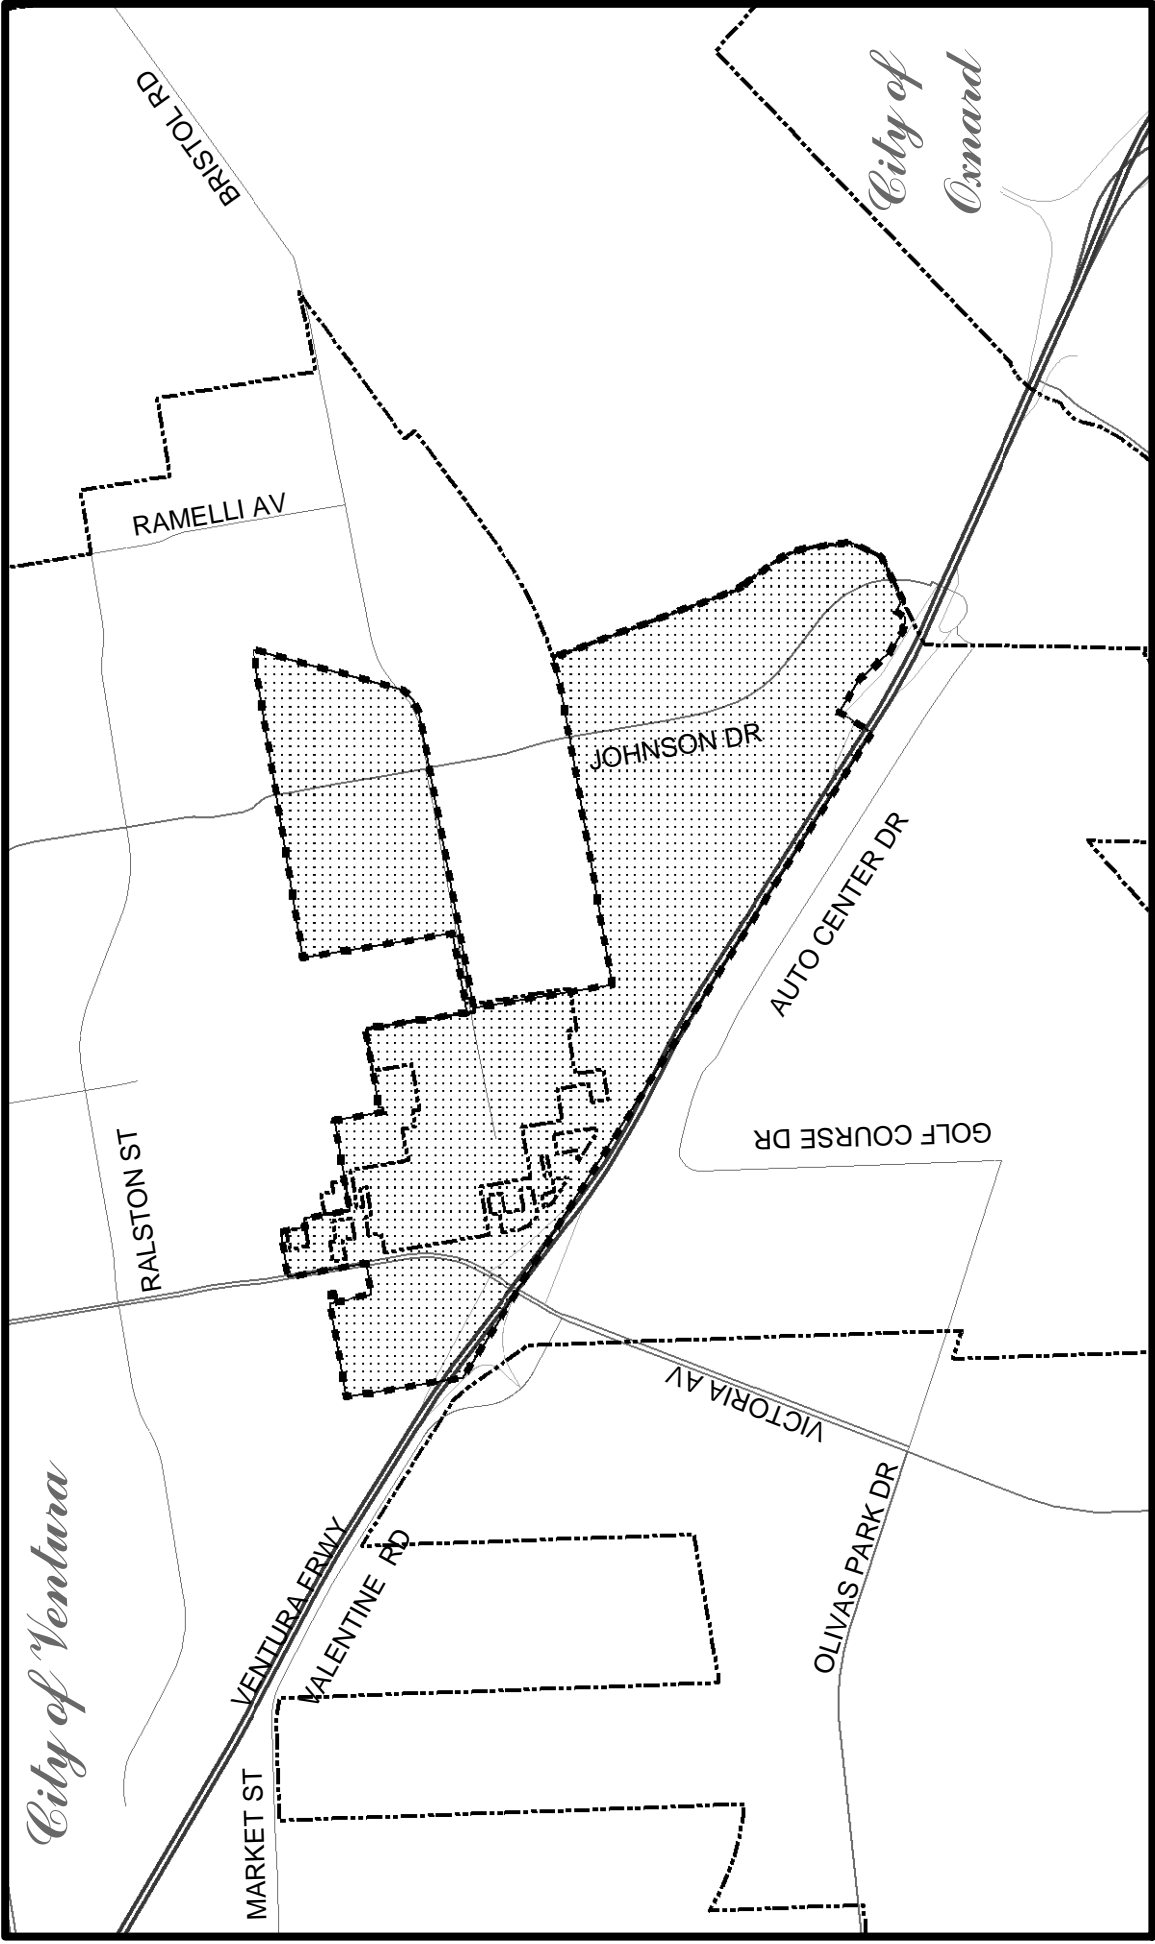

MONTALVO MUNICIPAL IMPROVEMENT DISTRICT

1993 Special District Study Recommendation

The study made no recommendations.

2001 Special District Study Recommendations

As a part of the service review process per Government Code Section 56430 consideration should be given to having the district merge with the City of Ventura.

SUMMARY

The District was originally formed to combat saltwater intrusion within its boundaries by construction of a pipeline to supply injection wells. The line was later used to distribute water to agricultural and other uses. This permits the use of imported water as opposed to groundwater from the aquifers in the Ocean View area.

This pipeline was purchased by the City of Oxnard in 1967. The City agreed to serve pipeline customers located outside of the City.

The District's function at the time of the last study was to retire bonded debt that was to be completed in 1992. However, at this time they continue to serve and deliver water service to approximately 1,000 residents.

SPHERE OF INFLUENCE

The sphere follows the existing District boundaries.

1972 Special District Study Recommendation

The study recommended that the lands be detached from the Ocean View Water District when they are annexed to Calleguas.

1985 Special District Study Recommendation

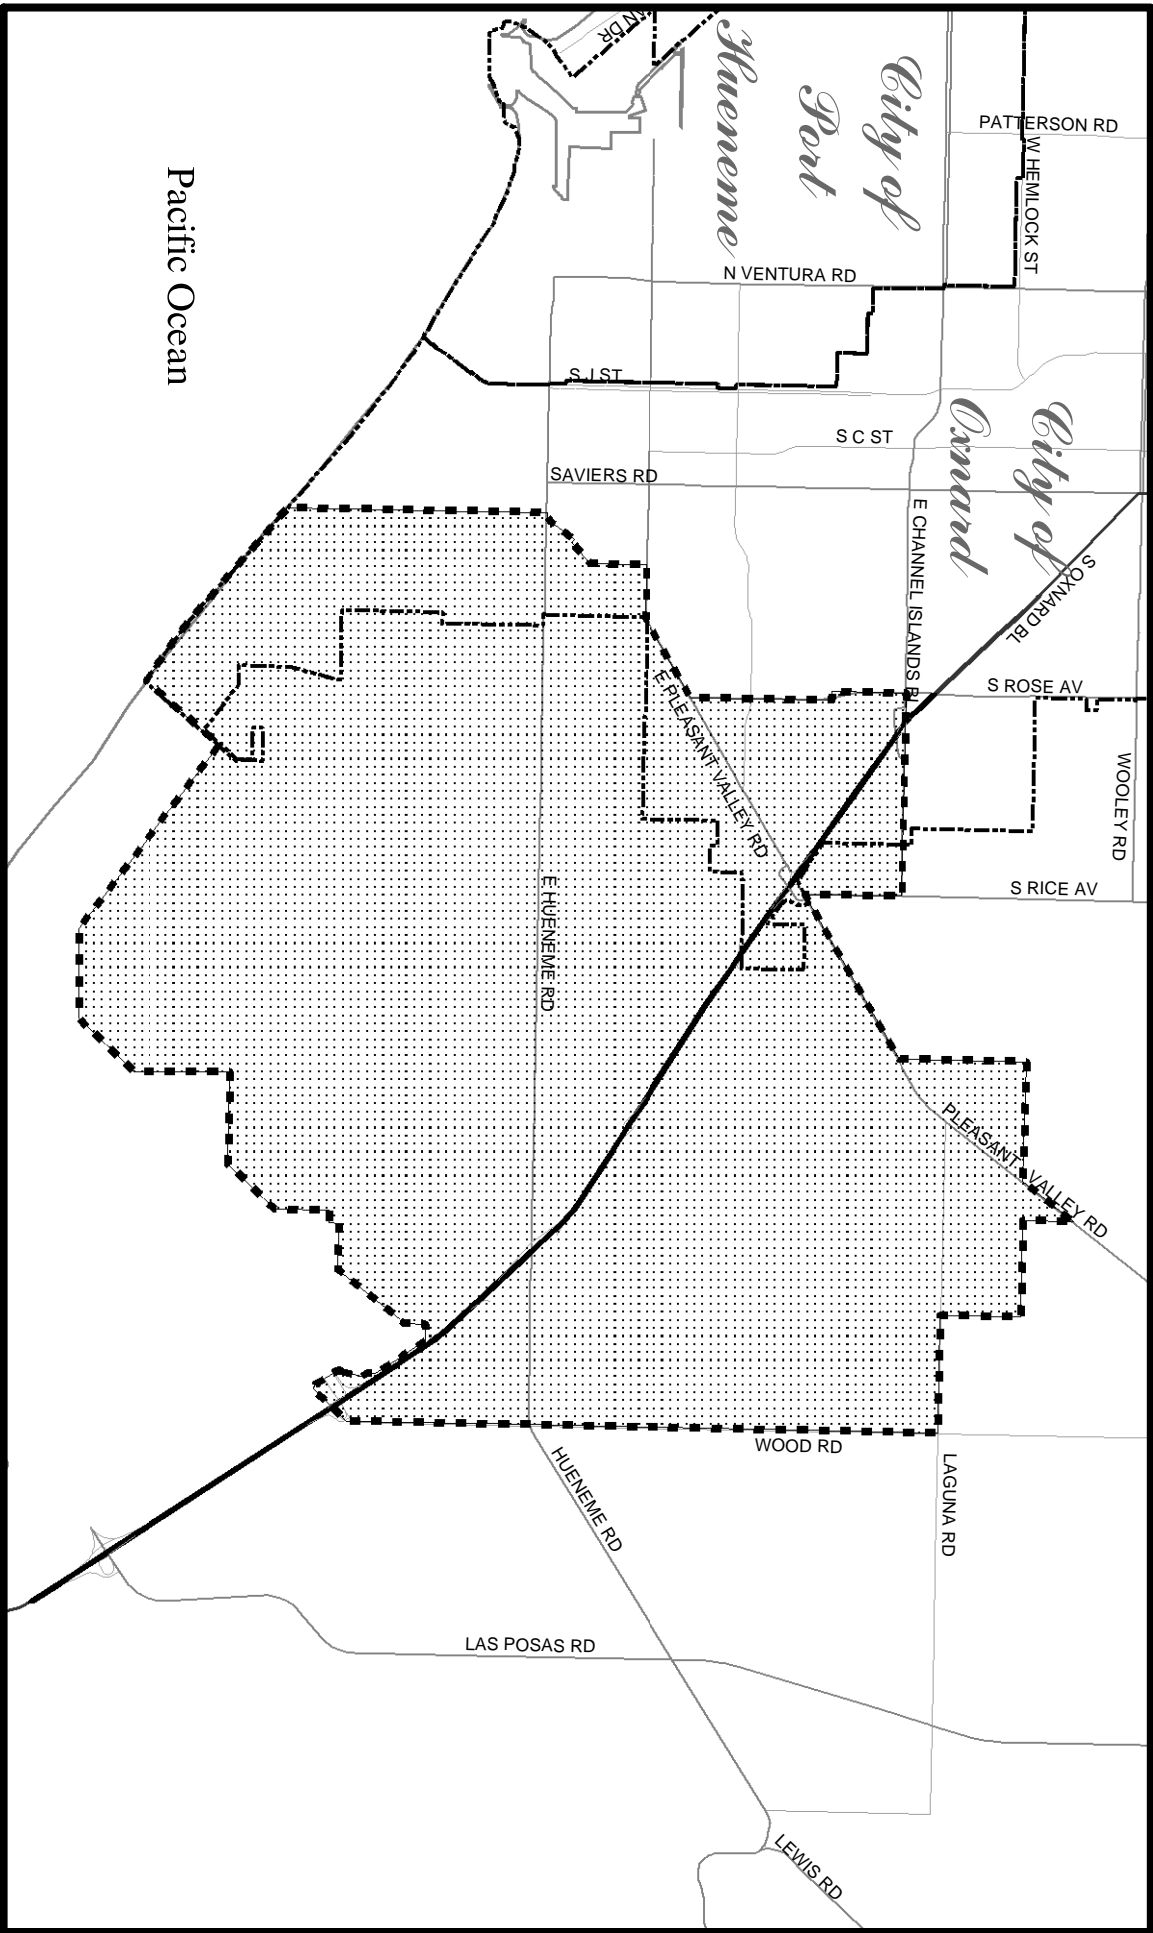

The study recommended that the District be dissolved or consolidated with other agencies. This dissolution was recommended to occur when the bonded debt was paid.

1993 Special District Study Recommendations

The study made no recommendations.

2001 Special District Study Recommendation

As a part of the overall service review process per Government Code Section 56430, consolidation with other districts should be considered.

would Involve**

LAFCO: District to apply for a comprehensive review of their sphere and agency boundaries.

SUMMARY

The District provides sewage collection and treatment services. The District was formed in 1985 as a result of the consolidation of the Meiners Oaks, Oak View, and Ventura Avenue Sanitary Districts and with the annexation of the area covered by the City of Ojai.

SPHERE OF INFLUENCE

The sphere for this District is in need of comprehensive review. Property annexed to and served by the District is outside of their sphere of influence. The District has a number of disconnected sphere areas that should be considered for one comprehensive sphere line.

1972 Special District Study Recommendation

The study recommended that the sanitary district in the Ventura River valley consider consolidation. This consolidation was completed.

1985 Special District Study Recommendation

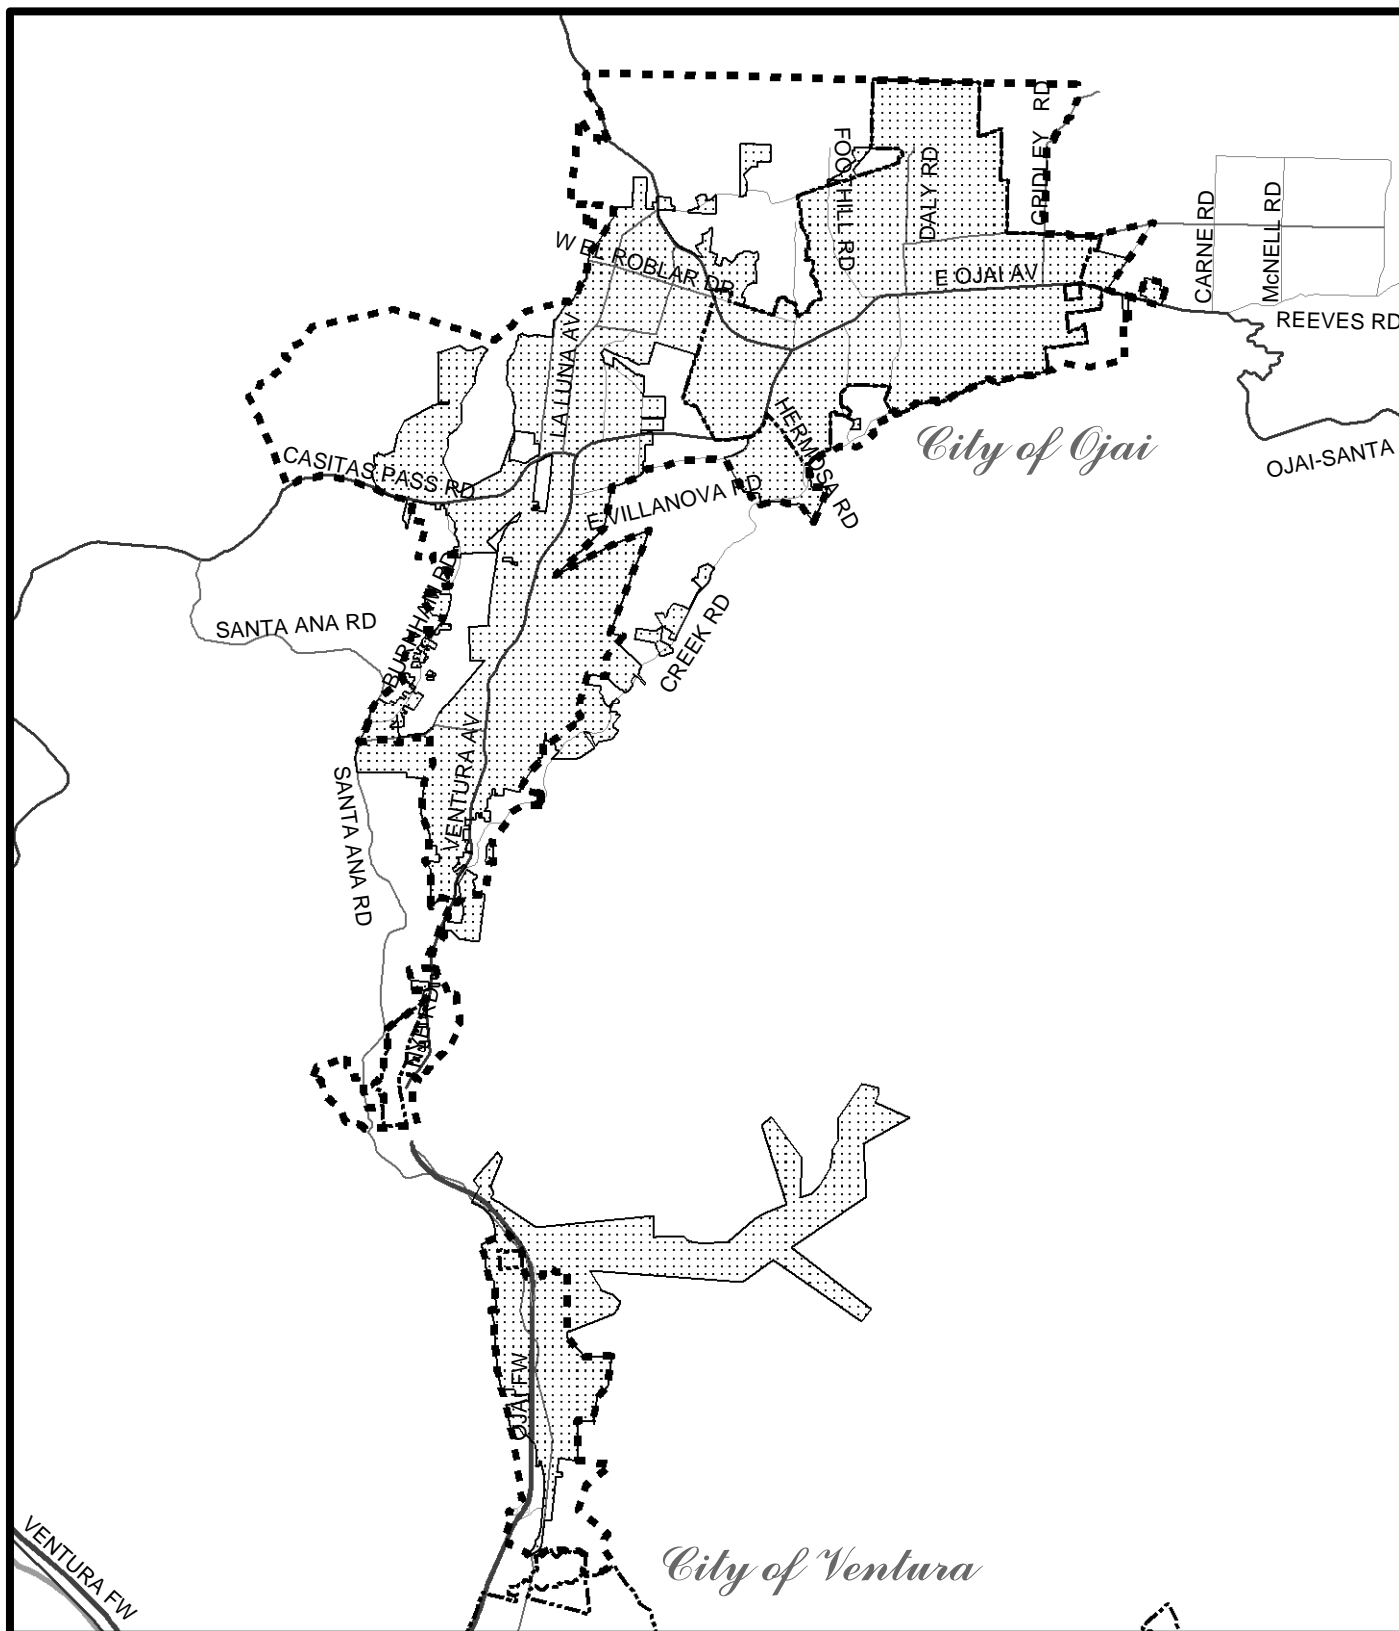

The study made no recommendations.

1993 Special District Study Recommendations

The study made no recommendations.

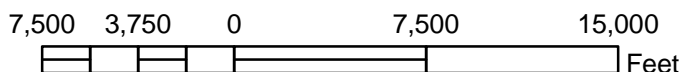

2001 Special District Study Recommendations

As part of the overall service review process per Government Code Section 56430 there should be a comprehensive review and revision of the District's boundaries and sphere of influence including annexation of existing "island" areas within the sphere boundaries of the District. The District should review their budget and revenue structure to ensure that costs and fees associated with annexation of these islands become applicable and payable at such time that sewer connections occur.

SUMMARY

The District diverts San Antonio Creek into spreading grounds that recharge the water table in the eastern Ojai Valley.

Those who pump water from aquifers underlying the eastern Ojai Valley are beneficiaries of the District's activities. The Southern California Water Company's wells, which supply the City of Ojai, are within the District and tap aquifers replenished by the spreading grounds.

The agency provides one board member to the Ojai Basin Groundwater Management Agency.

District was formerly known as the San Antonio Water Conservation District.

SPHERE OF INFLUENCE

The sphere follows the existing District boundaries, with the policy that if it is shown that areas outside of the District are benefited by the District's activities, consideration should be made to re-examining the sphere.

1972 Special District Study Recommendation

The study recommended the District appoint a representative to a study committee to evaluate unification of retail water service in the Ventura River Valley.

The District appointed a representative to the committee. There is no record of further action being taken.

1985 Special District Study Recommendation

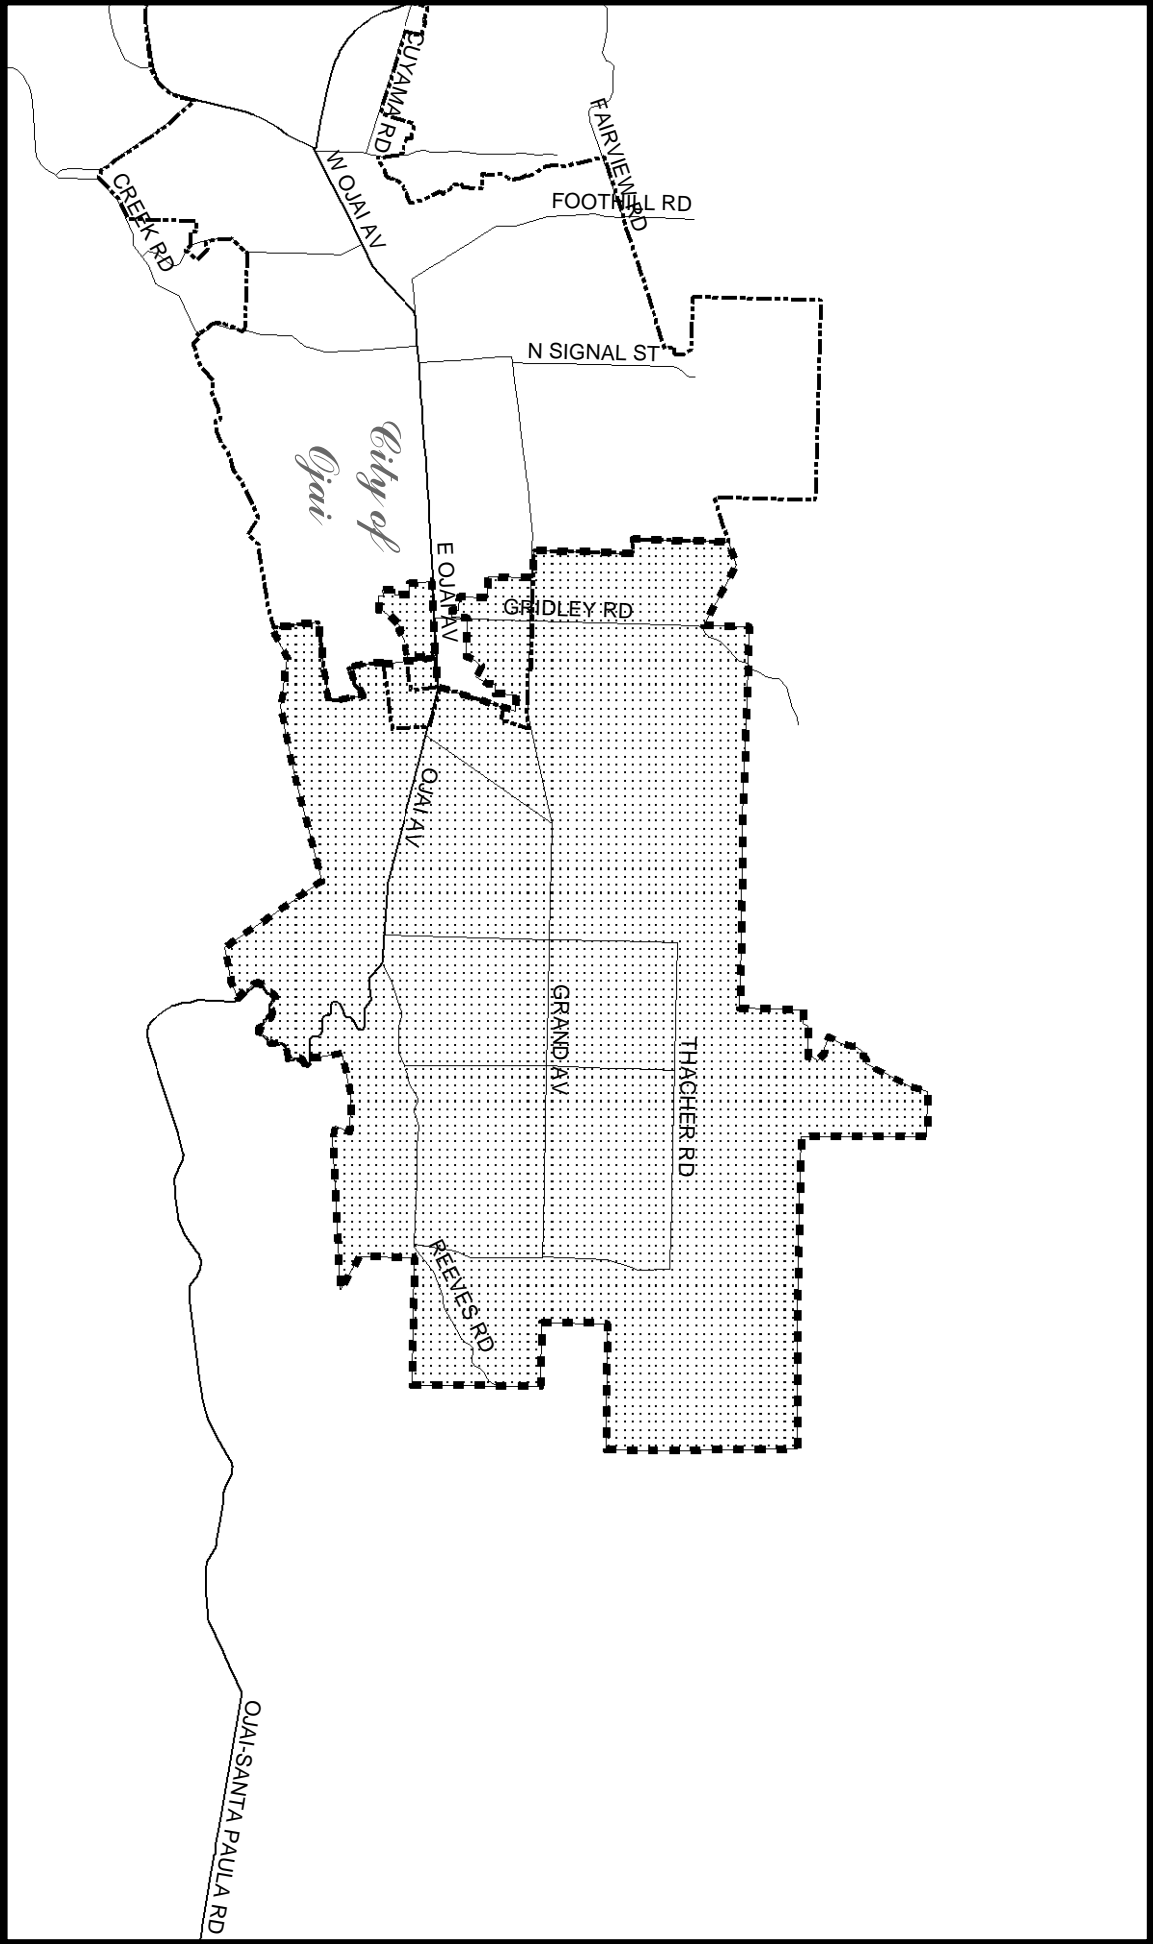

No recommendation was made.

1993 Special District Study Recommendations

No recommendation was made.

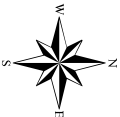

2001 Special District Study Recommendation

None, pending the overall service review process per Government code Section 56430.

LAFCO: Detachments should occur as land is approved for development.

SUMMARY

Oxnard Drainage District No. 1 was formed to provide drainage for agricultural lands generally located between Harbor Boulevard to the West, Rose Avenue to the East, Gonzales to the North, and Channel Islands Boulevard to the South. When the District was formed in 1918, the water table in much of the District area was too high to allow for development. This problem was solved by the District through the use of clay pipes constructed below the surface that were used to collect waters to be carried away. This allowed for thousands of acres of agricultural lands to be productive.

Future urban uses, if approved will result in detachments from this District.

SPHERE OF INFLUENCE

The sphere follows the District boundaries except for lands within the spheres of the City of Oxnard and the City of Port Hueneme.

1972 Special District Study Recommendation

The Study recommended that the land within the incorporated cities be detached. This detachment was completed.

1985 Special District Study Recommendation

The study made no recommendations.

1993 Special District Study Recommendations

The study made no recommendations.

2001 Special District Study Recommendations

None, pending the overall service review process per Government Code Section 56430.

**Future Plans that
would Involve****LAFCO:** none**SUMMARY**

The District owns and operates the Port of Hueneme, a commercial deep-water port in the City of Port Hueneme. The District is responsible for the construction, maintenance, and operations of ship loading and unloading facilities and storage areas.

In 1966, the County Administrative Office studied expanding the boundaries of the District. The study found that the Port of Hueneme is an important economic asset with significant impacts on the economy of the entire County and that benefits from the port activities accrue to an area greater than the District itself. The report concluded that the boundaries of the District, which was formed to support limited agricultural shipments, were inappropriate to the expanding shipping experienced by the Port. It was recommended that, if expanded, the District should encompass at a minimum the inhabited portions of the southern part of the County

In 1989, LAFCO approved a reorganization for Oxnard Harbor District (LAFCO 89-25) that detached approximately 119,000 acres from the City of Camarillo and the City of Thousand Oaks and adjacent unincorporated areas from the District.

SPHERE OF INFLUENCE

The sphere follows the existing District boundaries.

1972 Special District Study Recommendation

The Study found the observations in the 1966 report to be even more valid and recommended that the County Administrative Office prepare a follow-up study, jointly with the Oxnard Harbor District, regarding alternative methods of expanding the District's boundaries and tax base.

The Study was completed in 1973 and the District submitted a proposal to annex the remainder of the County. The application was opposed by areas outside of the District, including the cities of Ojai, San Buenaventura, and Simi Valley, and was denied by LAFCO in 1974.

1985 Special District Study Recommendation

The study recommended inclusion of the entire County in the District, which was denied by LAFCO.

would involve**

LAFCO: Potential consolidation with the Bardsdale Cemetery District, or dissolution.

SUMMARY

This District serves the community of Piru and surrounding area. It owns and operates the Piru Cemetery that is approximately 12 acres in area. The District's revenues are from the sale of burial plots. Revenues are declining as the cemetery becomes full and the long-term viability of the District is in question.

SPHERE OF INFLUENCE

The sphere follows the existing District boundary.

1972 Special District Study Recommendation

The study recommended that the LAFCO staff, in cooperation with the Districts, prepare a feasibility report on the subject of consolidation with the Bardsdale Cemetery District. This study was not completed.

1985 Special District Study Recommendation

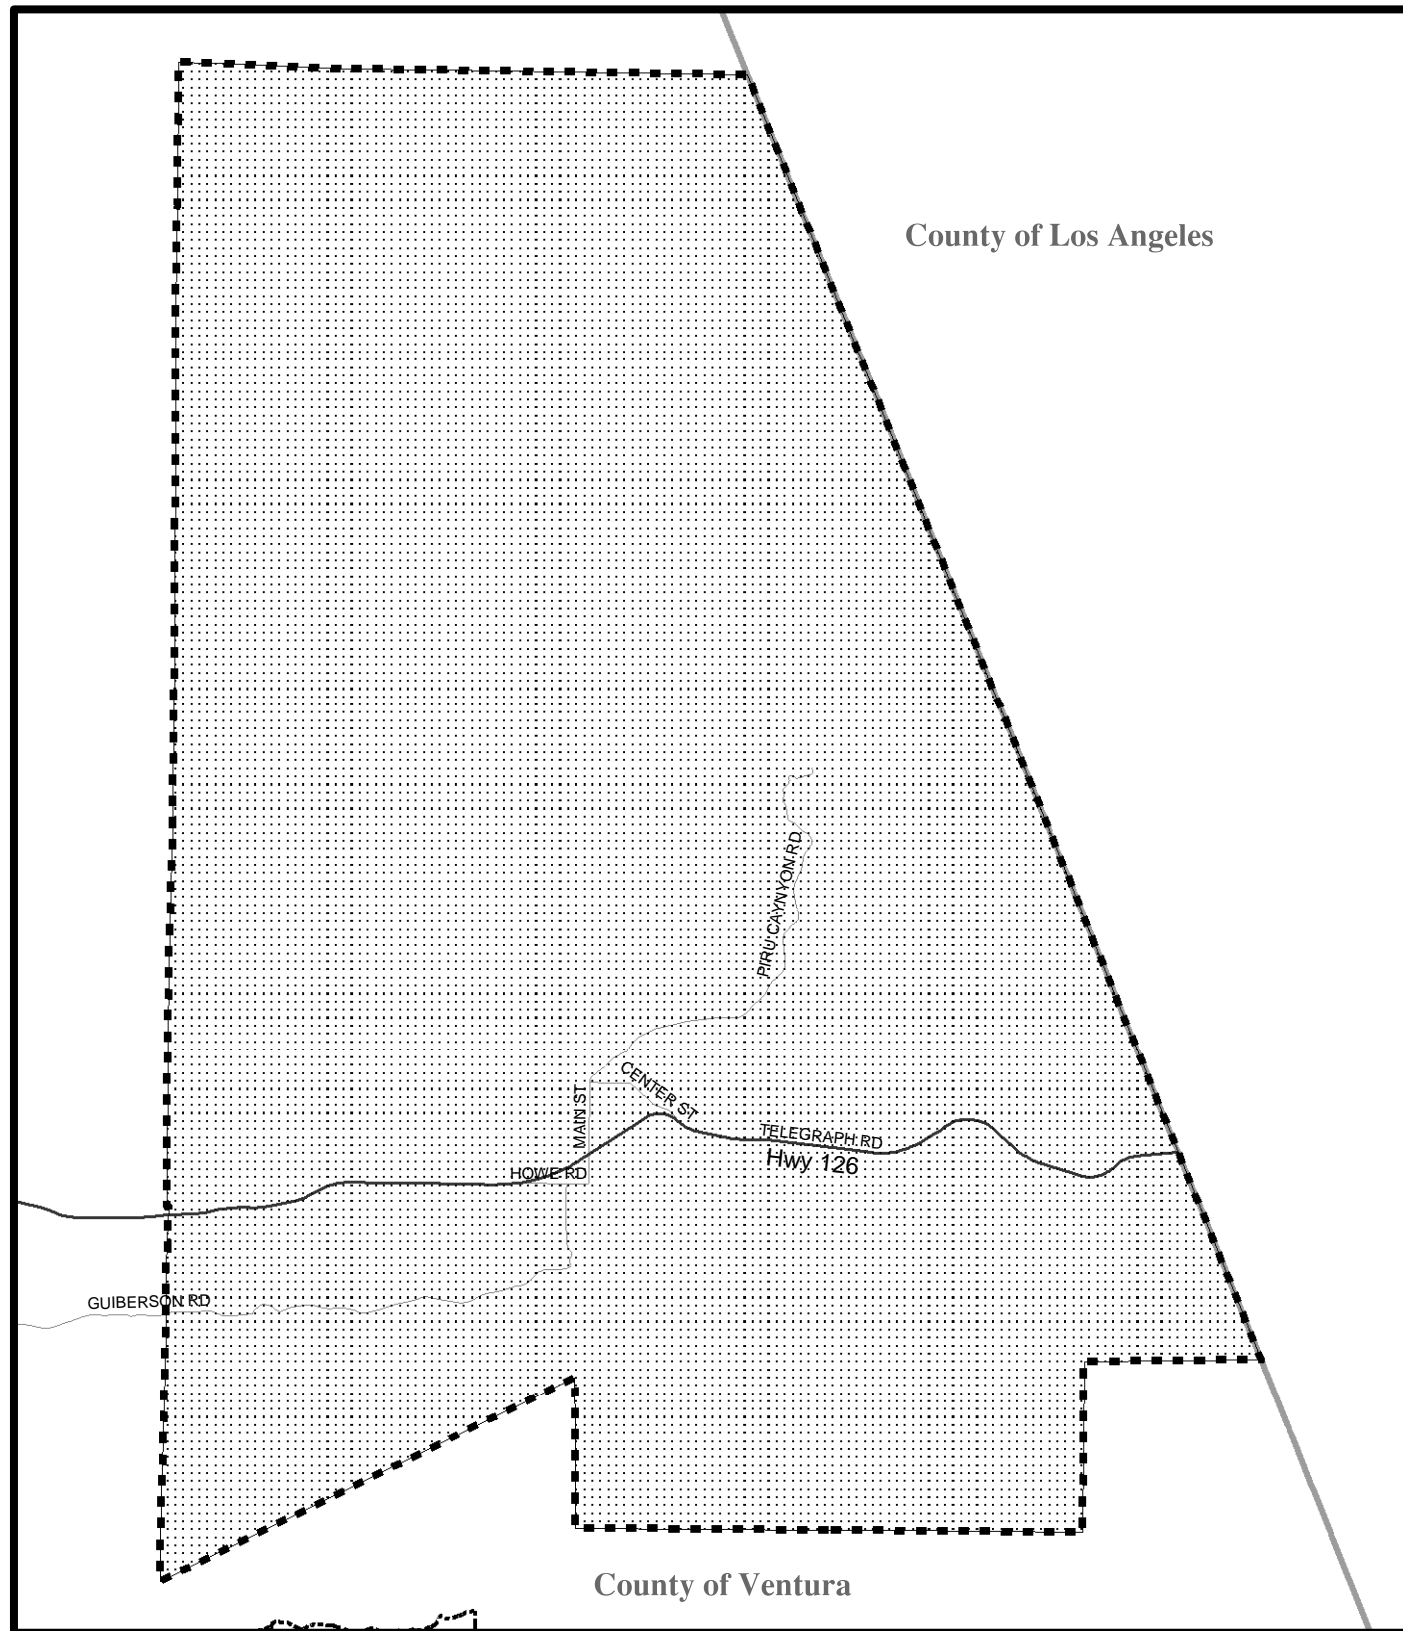

The District, in conjunction with LAFCO staff, should evaluate future consolidation.

1993 Special District Study Recommendations

The Study recommended eventual consolidation of the District.

2001 Special District Study Recommendations

It is unclear as to what level the District is functioning. Grave plots are almost full and revenues are declining. If the District dissolves it reverts to the County of Ventura. A preferable option may be to consolidate this District with the Bardsdale Cemetery District. This option, along with dissolution, should be considered as part of the overall service review process per Government Code Section 56430. A consolidated District (with Bardsdale Cemetery) may be able to perform maintenance and burial functions more economically than by having two separate operations.

SUMMARY

The District operates and maintains a distribution system for agricultural water. The water is obtained from the United Water Conservation District. This supplements groundwater supplies and helps alleviate salt-water intrusion under the Oxnard Plain.

SPHERE OF INFLUENCE

The sphere follows the existing District boundaries with the policy that it should be amended periodically to exclude developed areas that no longer receive District services.

1972 Special District Study Recommendation

The study recommended that lands be detached from the District when they are annexed to the Calleguas Municipal Water District. No lands within the District have been proposed for annexation to Calleguas.

The Study also recommended that the District, jointly with the identically shaped Pleasant Valley Municipal water District, study dissolution of one or the other of the Districts. (The Pleasant Valley Municipal Water District was dissolved in 1988.)

1985 Special District Study Recommendation

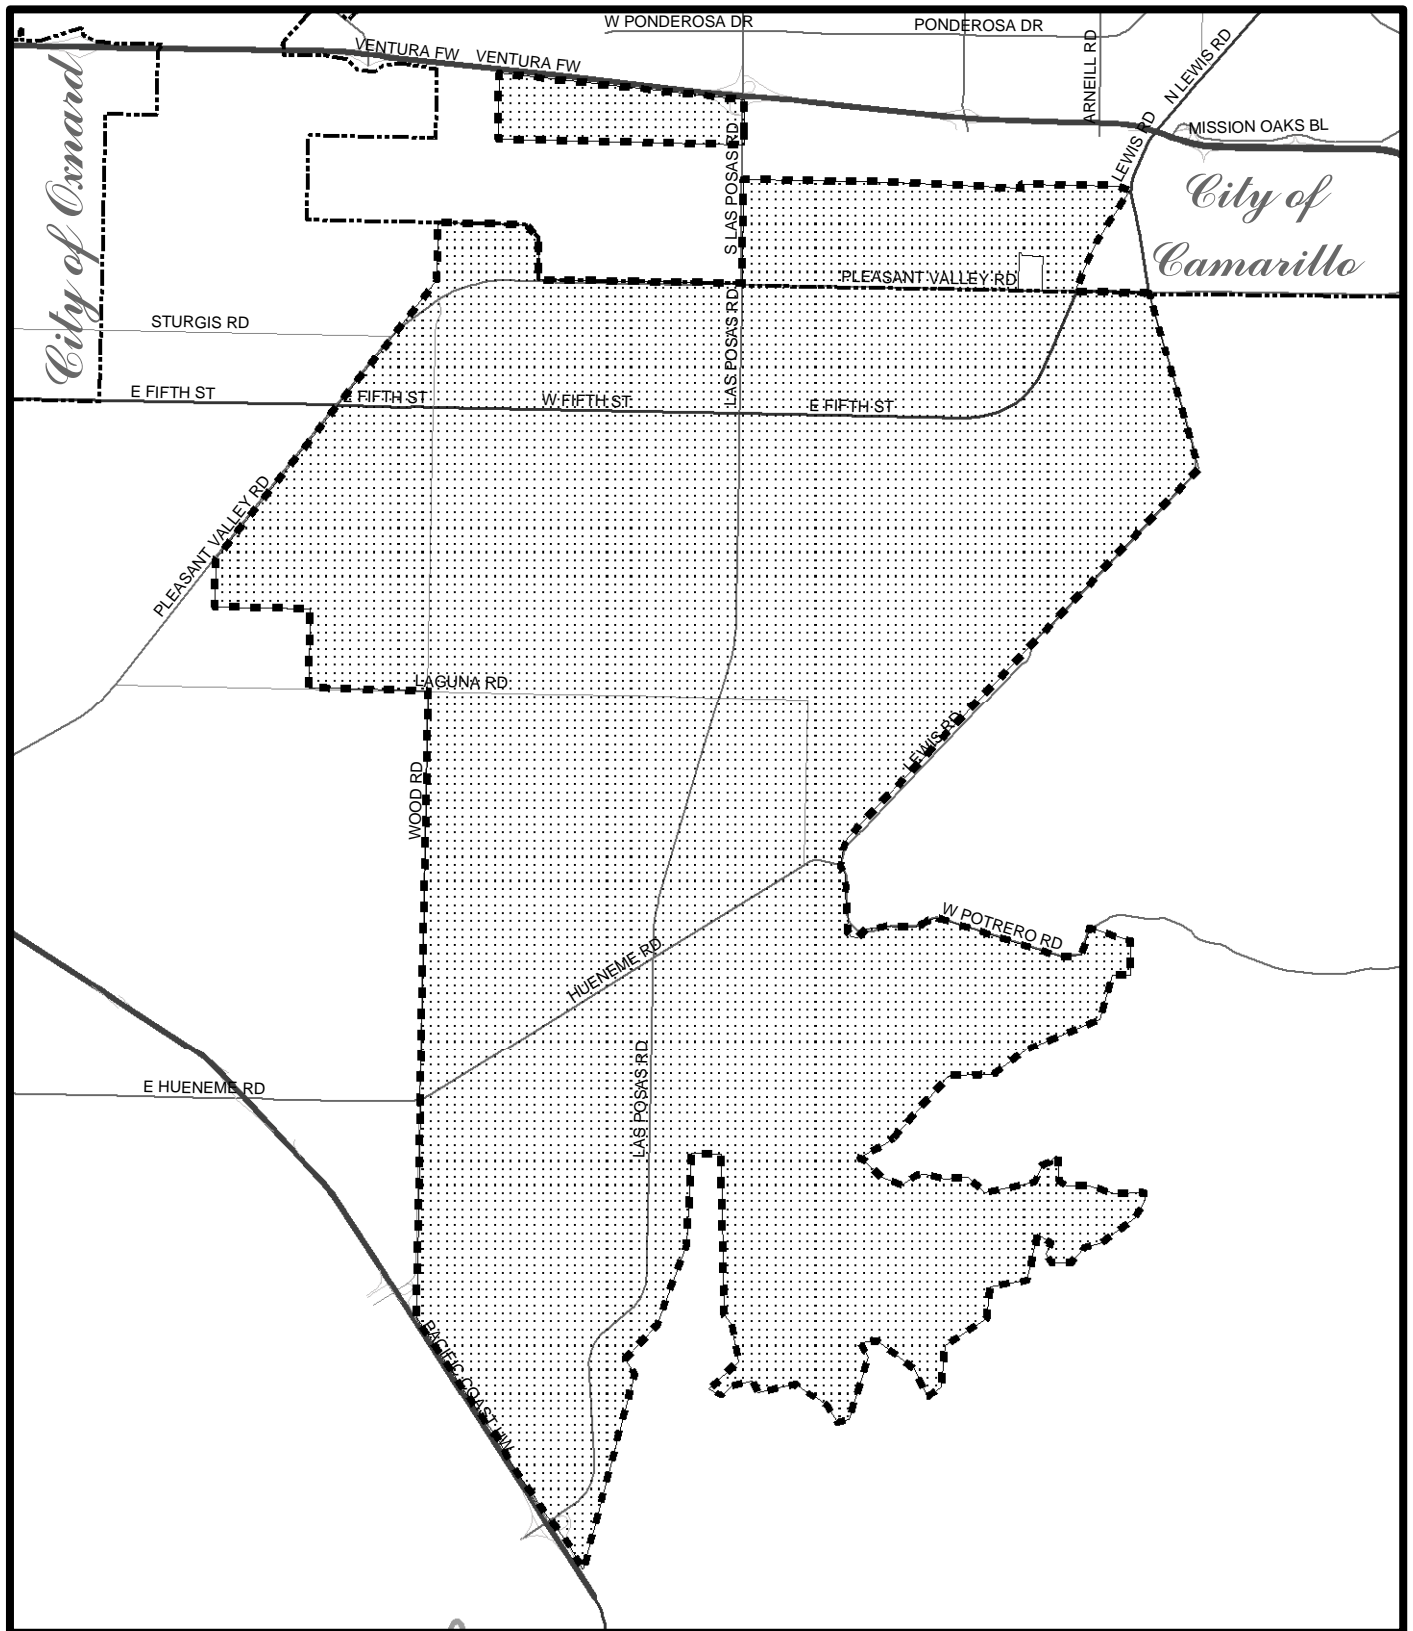

The study recommended that as lands are developed and no longer require agriculture water services provided by the District.

1993 Special District Study Recommendations

The study made no recommendations.

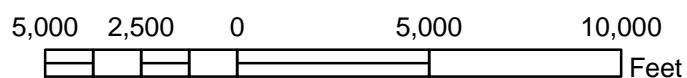

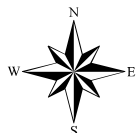

2001 Special District Study Recommendations

None, pending the overall service review process per Government Code Section 56430.

SUMMARY

The District includes the City of Camarillo, the Camarillo Heights, and the majority of the Las Posas Estates and agricultural and open space lands south of the city.

Approximately 87% of the District's population and 43% of its land areas are within the City of Camarillo. Its boundaries are primarily based on the Pleasant Valley Elementary School District.

In 1984, a study committee consisting of two members of the District board, two members of the city council and three public members evaluated the possible reorganization of the District. The analysis focused on potential financial changes that could be anticipated if the City governed the District.

The study concluded that no significant change in either the level of service or revenues would be obtained by converting the District to a dependent District or to a department of the City. While there may be some advantages, the degree of benefit would depend largely on matters of State and Federal legislation.

SPHERE OF INFLUENCE

The sphere follows the District boundaries and includes lands within the City sphere that are not now within the District.

1972 Special District Study Recommendation

The study recommended that lands annexed to the City also be annexed to the District and the District annex adjacent urban areas, specifically in the Las Posas Estates. LAFCO has required that lands annexed to the City also be annexed to the District. No applications were taken to annex the remainder of Las Posas Estates.

1985 Special District Study Recommendation

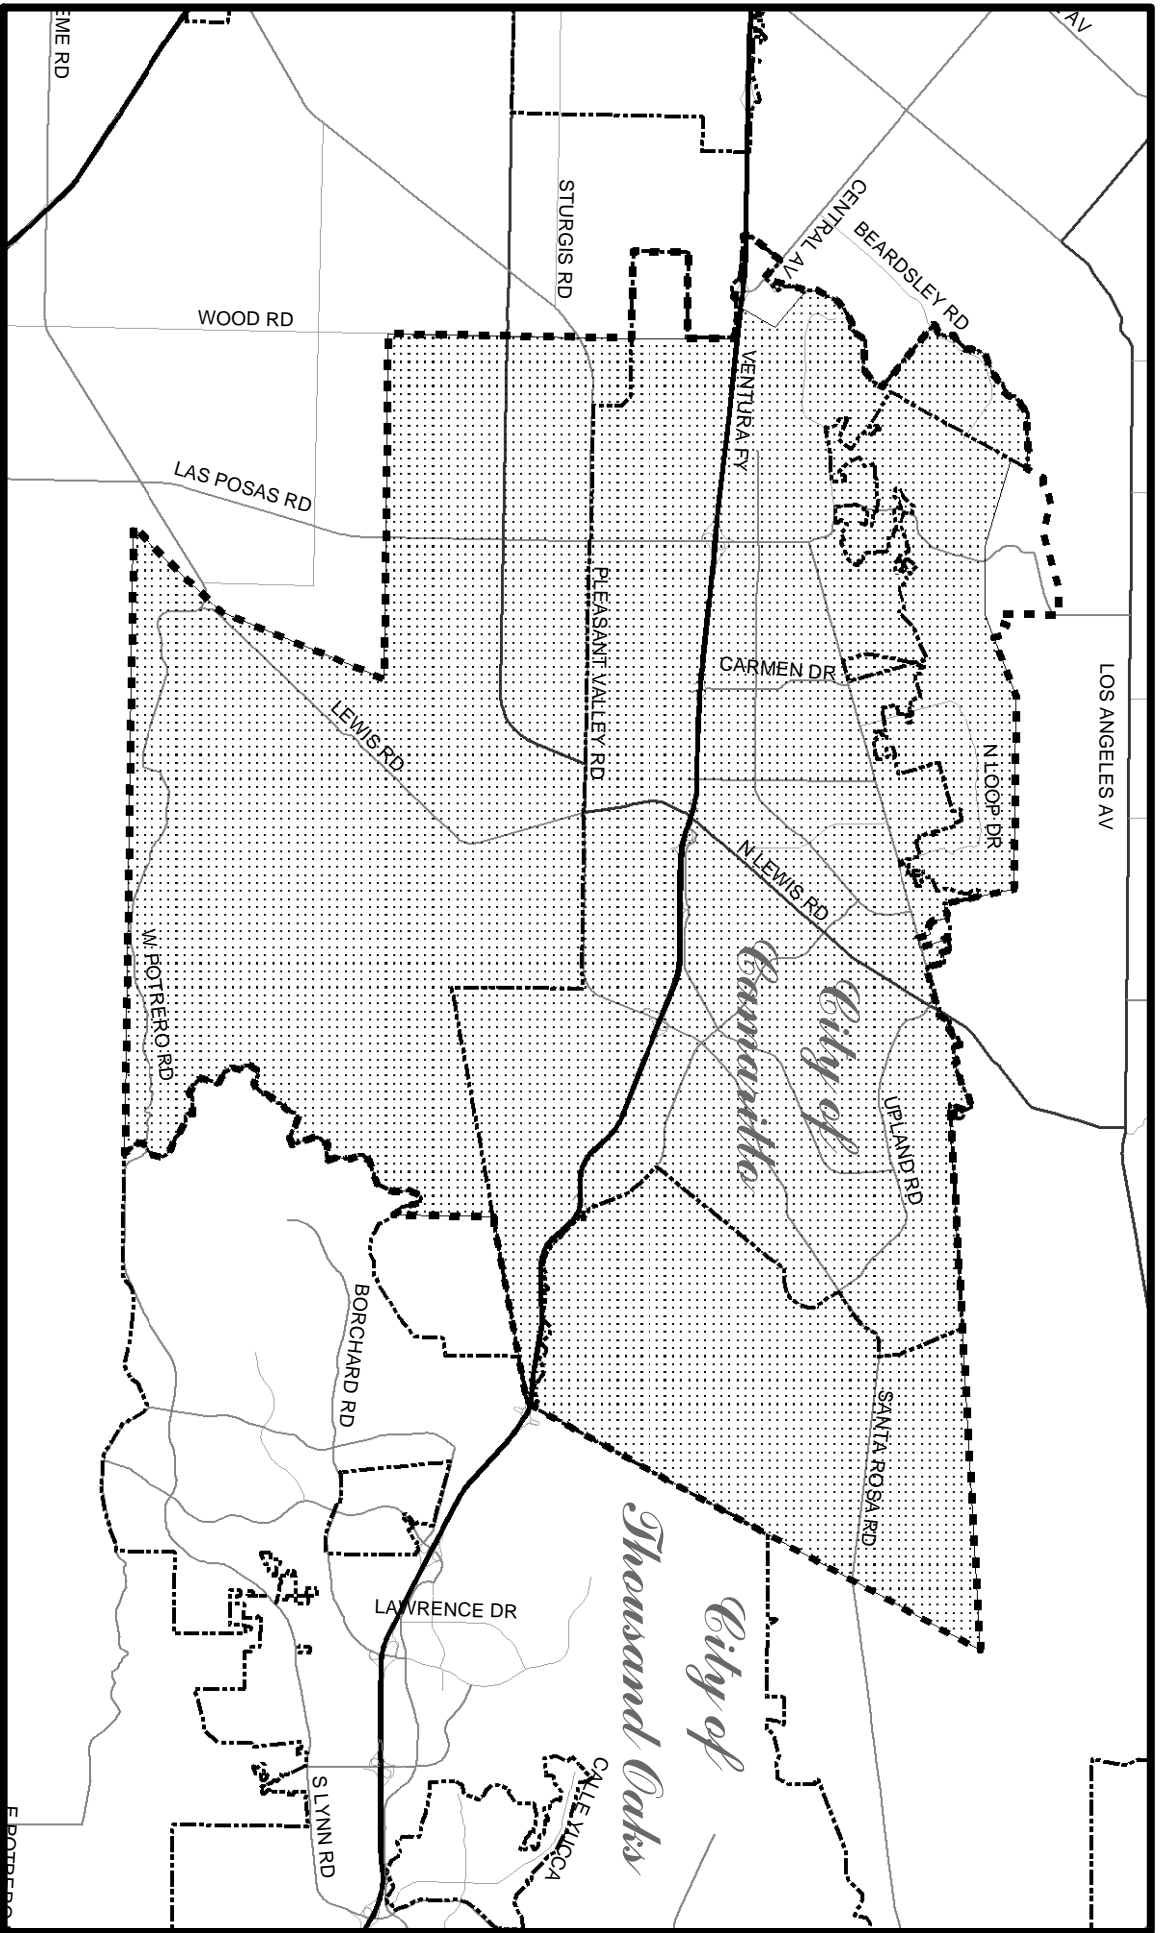

The study made no recommendations.

1993 Special District Study Recommendations

The study made no recommendations.

2001 Special District Study Recommendations

None, pending the service review process per Government Code Section 56430.

Agreements with Others to Provide Services:

The District is a member of the Santa Monica Mountains Conservancy, a Joint Powers Agency. Joint Use Facilities Agreements are with the Simi Valley Unified School District and with the Oak Park Unified School District.

**Future Plans that
would Involve**

LAFCO: none

SUMMARY

The District includes the entire Simi Valley, land south of the Simi Hills and a portion of the eastern Tierra Rejada Valley. District boundaries are based on the Simi Valley Unified School District as it existed prior to the Oak Park Unified School District, and therefore, extend beyond the Simi Valley Area of Interest. Over 90% of the District's population and 30% of its land area are included within the City.

Bell Canyon was detached from the District in 1984 in conjunction with the formation of the Bell Canyon Community Services District.

SPHERE OF INFLUENCE

The sphere follows the District boundaries except for lands south of Simi Hills and the Tierra Rejada Valley. By policy, developed areas south of the Simi Hills can be detached only if there is a replacement agency available to continue the services.

1972 Special District Study Recommendation

The Study recommended that the Board of Supervisors initiate proceedings to detach the portion of the District within the Moorpark Area of Interest. This detachment of 10,040 acres was completed in 1975.

1985 Special District Study Recommendation

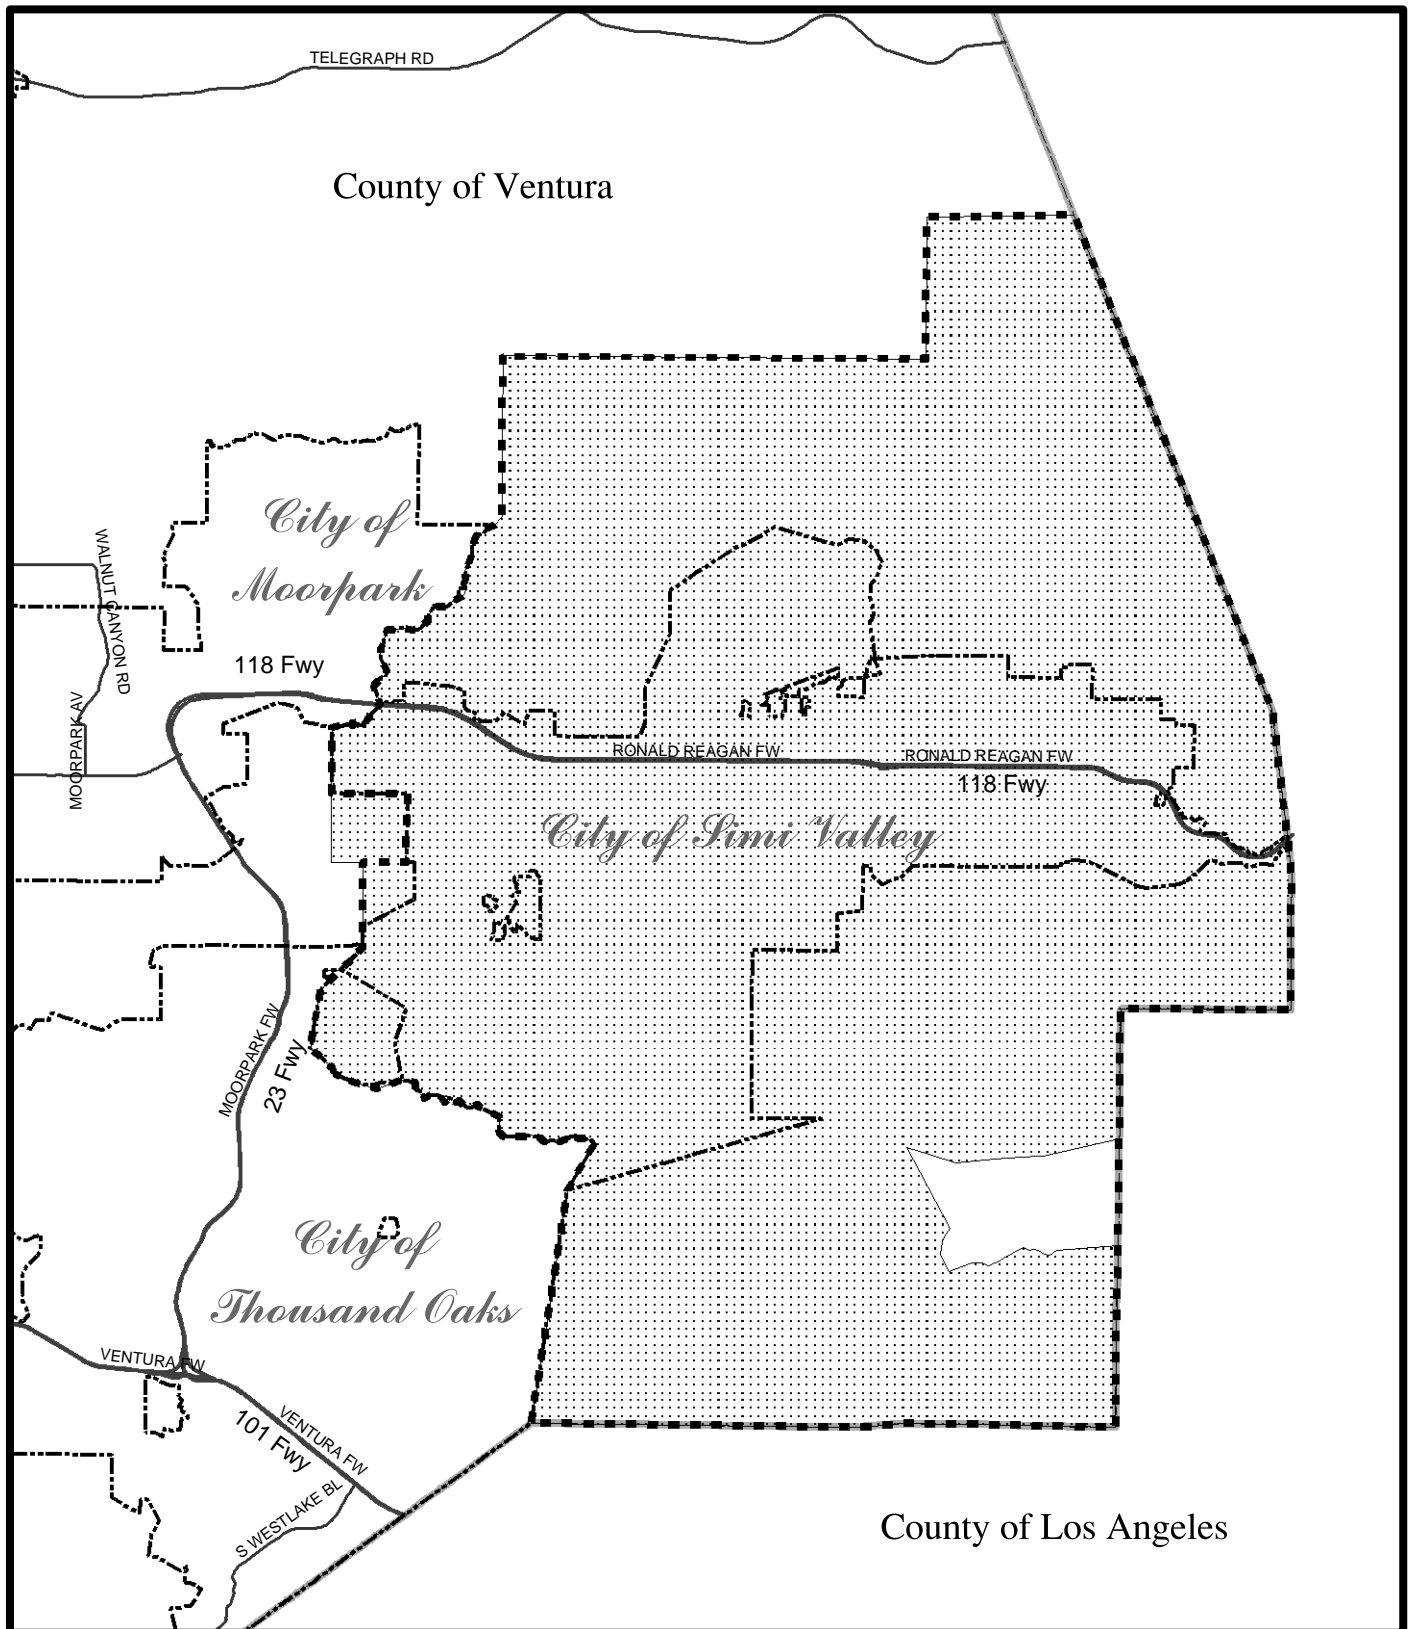

There were no recommendations made.

1993 Special District Study Recommendations

There were no recommendations made.

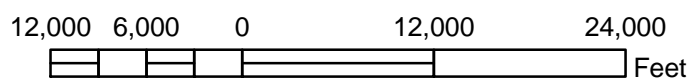

2001 Special District Study Recommendations

None, pending the service review process per Government Code section 56430.

Future Plans that would Involve

LAFCO: The District paid outstanding bond debt in June of 2001. Future plans are to dissolve the District or consolidate into another water district, such as Calleguas Municipal Water District or to transfer the functions of the District to the City of Thousand Oaks.

SUMMARY

The District is a wholesale water provider and operates and maintains water storage transfer facilities for a Westlake Village area. The District purchases from a single supplier, Calleguas Municipal Water District, and sells to a single customer, California Water Service Company.

The District was formed with the defensive purpose of preventing the premature expansion of the Calleguas Municipal Water District. When the principal landowners decided annexation to Calleguas was appropriate, the entire District was annexed.

The District is included entirely within the boundaries of the City of Thousand Oaks. If it were dissolved, either the City or the Calleguas District could perform the functions of maintaining and operating the District's facilities.

SPHERE OF INFLUENCE

The sphere follows the existing District boundaries.

1972 Special District Study Recommendation

The study recommended that the effects of dissolving the District be evaluated; however, no action was taken due to pending litigation involving the District. The litigation has since been resolved.

1985 Special District Study Recommendation

The study recommended that the District be dissolved and its responsibilities assumed by the Calleguas Municipal Water District or converted into a subsidiary district of the City of Thousand Oaks.

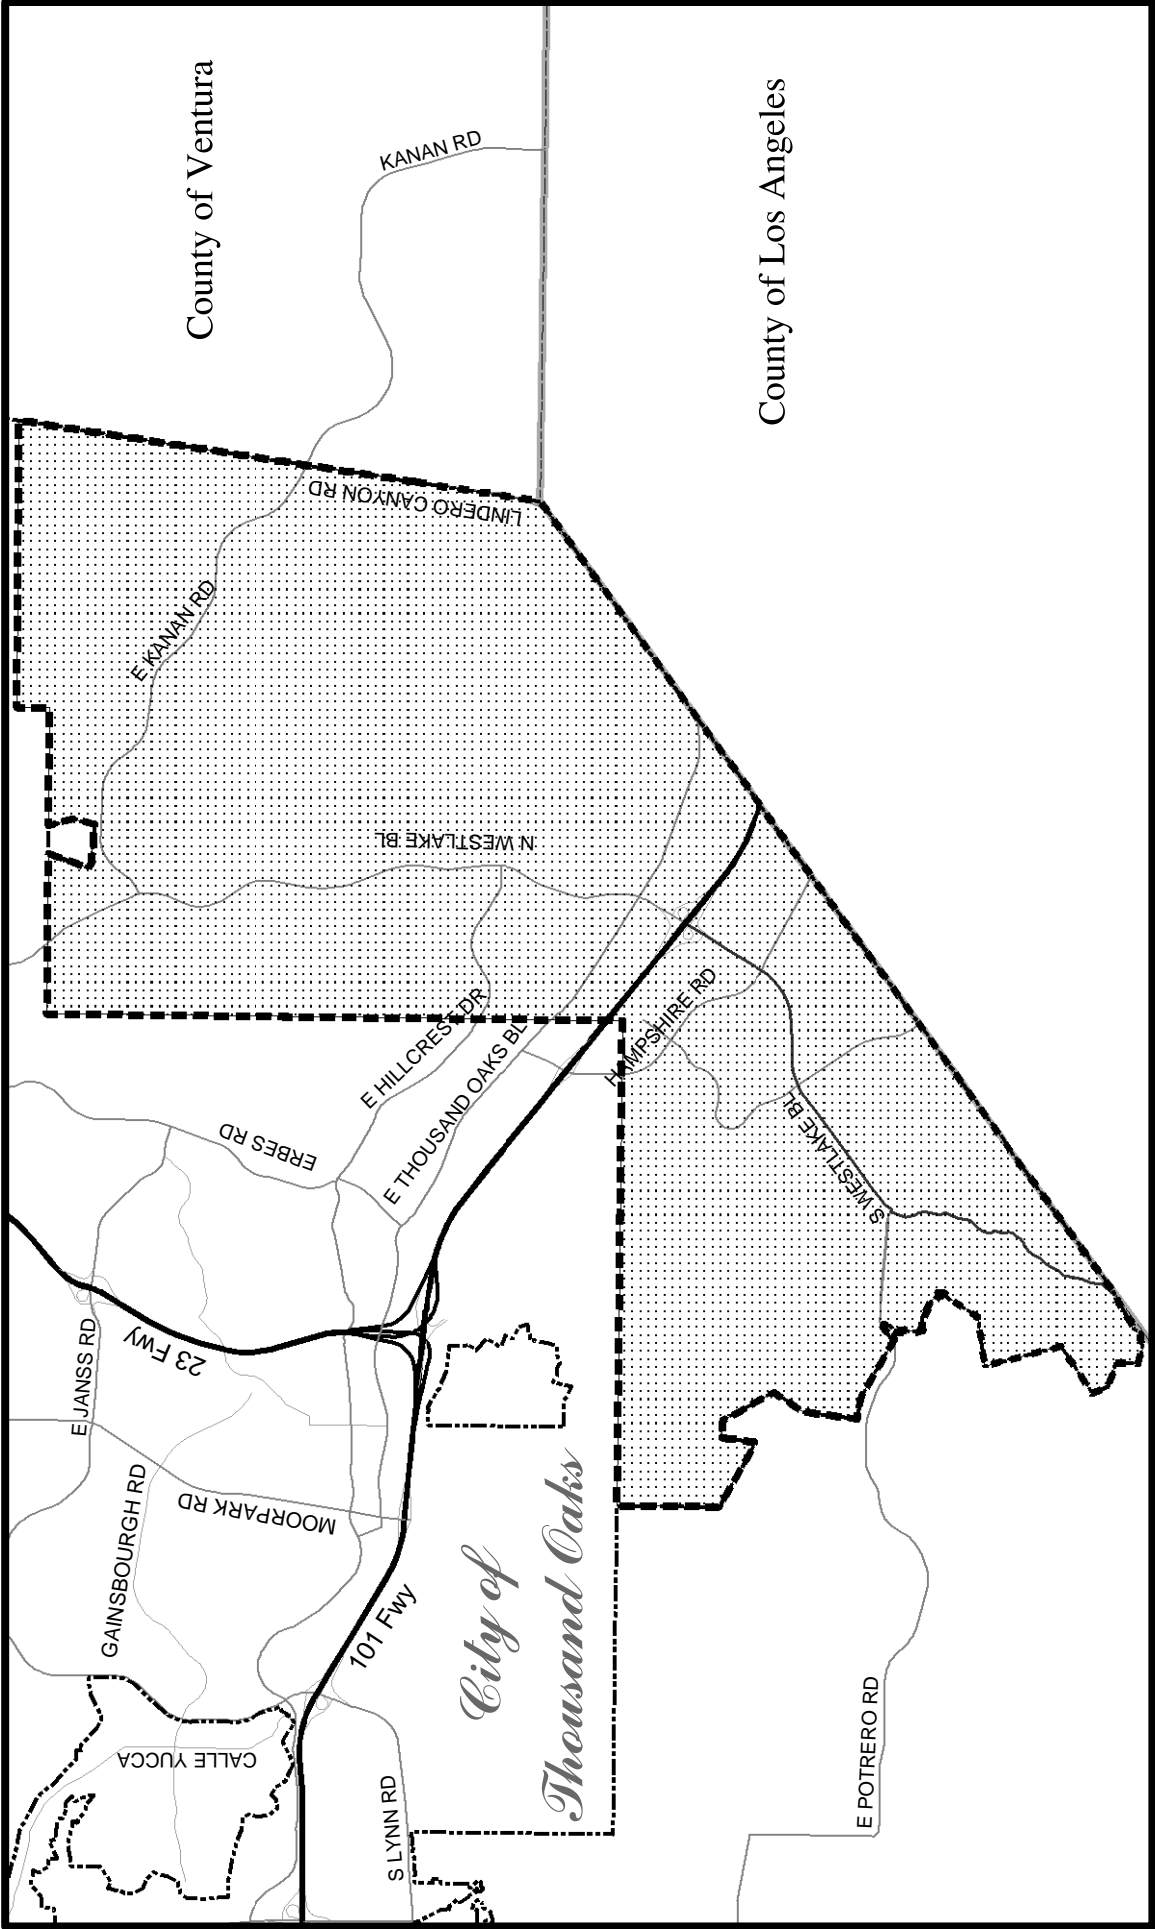

1993 Special District Study Recommendations

The District will dissolve in 2003 with the retirement of the remaining bonds. No action appeared to be necessary.

RUSSELL VALLEY MUNICIPAL WATER DISTRICT

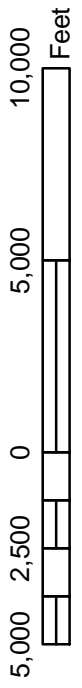

2001 Special District Study Recommendation

As of June 2001, the District paid outstanding bond debt and the remaining bonds are retired. LAFCO should assist the District in consolidating with another water district or transferring the functions of the District to the City of Thousand Oaks in order to serve Russell Valley Water District customers. This should become part of the overall service review process per Government Code Section 56430 for Calleguas Municipal Water District and/or the City of Thousand Oaks.

SUMMARY

The District conserves and distributes water. It operates the Santa Felicia dam and Freeman Diversion Dam, and releases water from Lake Piru to its spreading grounds to recharge aquifers underlying the Santa Clara Valley and the Oxnard Plain.

In cooperation with the County and the Fox Canyon Groundwater Management Agency, the District is implementing solutions to the saline water intrusion problem beneath the Oxnard Plain.

The District, with both irrigation and domestic wells, provides wholesale water through its Oxnard –Hueneme pipeline to the City of Oxnard and Port Hueneme Water Agency (which includes the Naval Construction Battalion Center and NAWS), plus several small mutual water agencies. It also wholesales agricultural water through its Pleasant Valley pipeline to the Pleasant Valley County Water District. It operates the Pumping Trough pipeline and reservoir to provide water to farmers in the pumping trough area in the Oxnard Plain.

VENTURA COUNTY RESOURCE CONSERVATION DISTRICT

Agreements with Others to Provide

Services: Coastal Conservancy, LA State Water Board, USDA – NRCS, Cooperative Extension, various landowners.

Future Plans that would Involve

LAFCO: none

SUMMARY

The District was organized in 1979 by the consolidation of the Ojai and South Ventura County Resource Conservation Districts. Those Districts encompassed the Ventura River and Calleguas Creek watersheds. As a part of the consolidation, most of the remaining County unincorporated area was annexed to the District, including the Santa Clara River watershed. All of the incorporated city areas were excluded from the District. As unincorporated areas are annexed to cities, a concurrent detachment from this District occurs.

District services are extended by contract to cities that desire assistance with erosion and other conservation issues.

Areas of Ventura County that are covered by Resource Conservation Districts from Los Angeles County are not part of this District. These areas include the Bell Canyon, Oak Park, and Frazier Park areas.

SPHERE OF INFLUENCE

The sphere follows the District boundaries except for lands south of the Simi Hills and the Tierra Rejada Valley. By policy, developed areas of the Simi Hills can only be detached if there is a replacement public agency available to continue the service.

1972 Special District Study Recommendation

The Study recommended that the Board of Supervisors initiate proceedings to detach the portion of the District within the Moorpark Area of Interest. This detachment was completed in 1975 and involved litigation.

SUMMARY

The District owns and operates the Ventura Harbor, a 275-acre facility located within the City of San Buenaventura.

The District provides small craft harbor facilities for commercial and recreational users requiring access to the open ocean. In providing such facilities, the District acquires land, constructs breakwaters, jetties and revetted slopes, dredges channels, operates a harbor patrol, leases land and water areas for development and regulates the operation of commercial facilities.

The City of San Buenaventura completed a service coordination study and consolidation analysis in 2001. The result was an agreement made between the two agencies to remain separate but to cooperated and communicate more, especially in terms of the development in Ventura Harbor

SPHERE OF INFLUENCE

The sphere is co-terminus with the City of San Buenaventura's sphere.

SUMMARY

The District operates and maintains a retail water distribution system for Casitas Springs, northern Oak View, and a small portion of the City of Ojai. Water is obtained from District wells and the Casitas Municipal Water District.

The District and the adjacent Meiners Oaks County Water District cooperate through an informal agreement by which they share labor and materials to perform maintenance functions in an emergency.

SPHERE OF INFLUENCE

The sphere follows the existing District boundaries.

1972 Special District Study Recommendation

The Study recommended that the District appoint a representative to a study committee to evaluate unification of retail water services in the Ventura River Valley. The District did make an appointment to the committee. No action resulted from this recommendation.

1985 Special District Study Recommendation

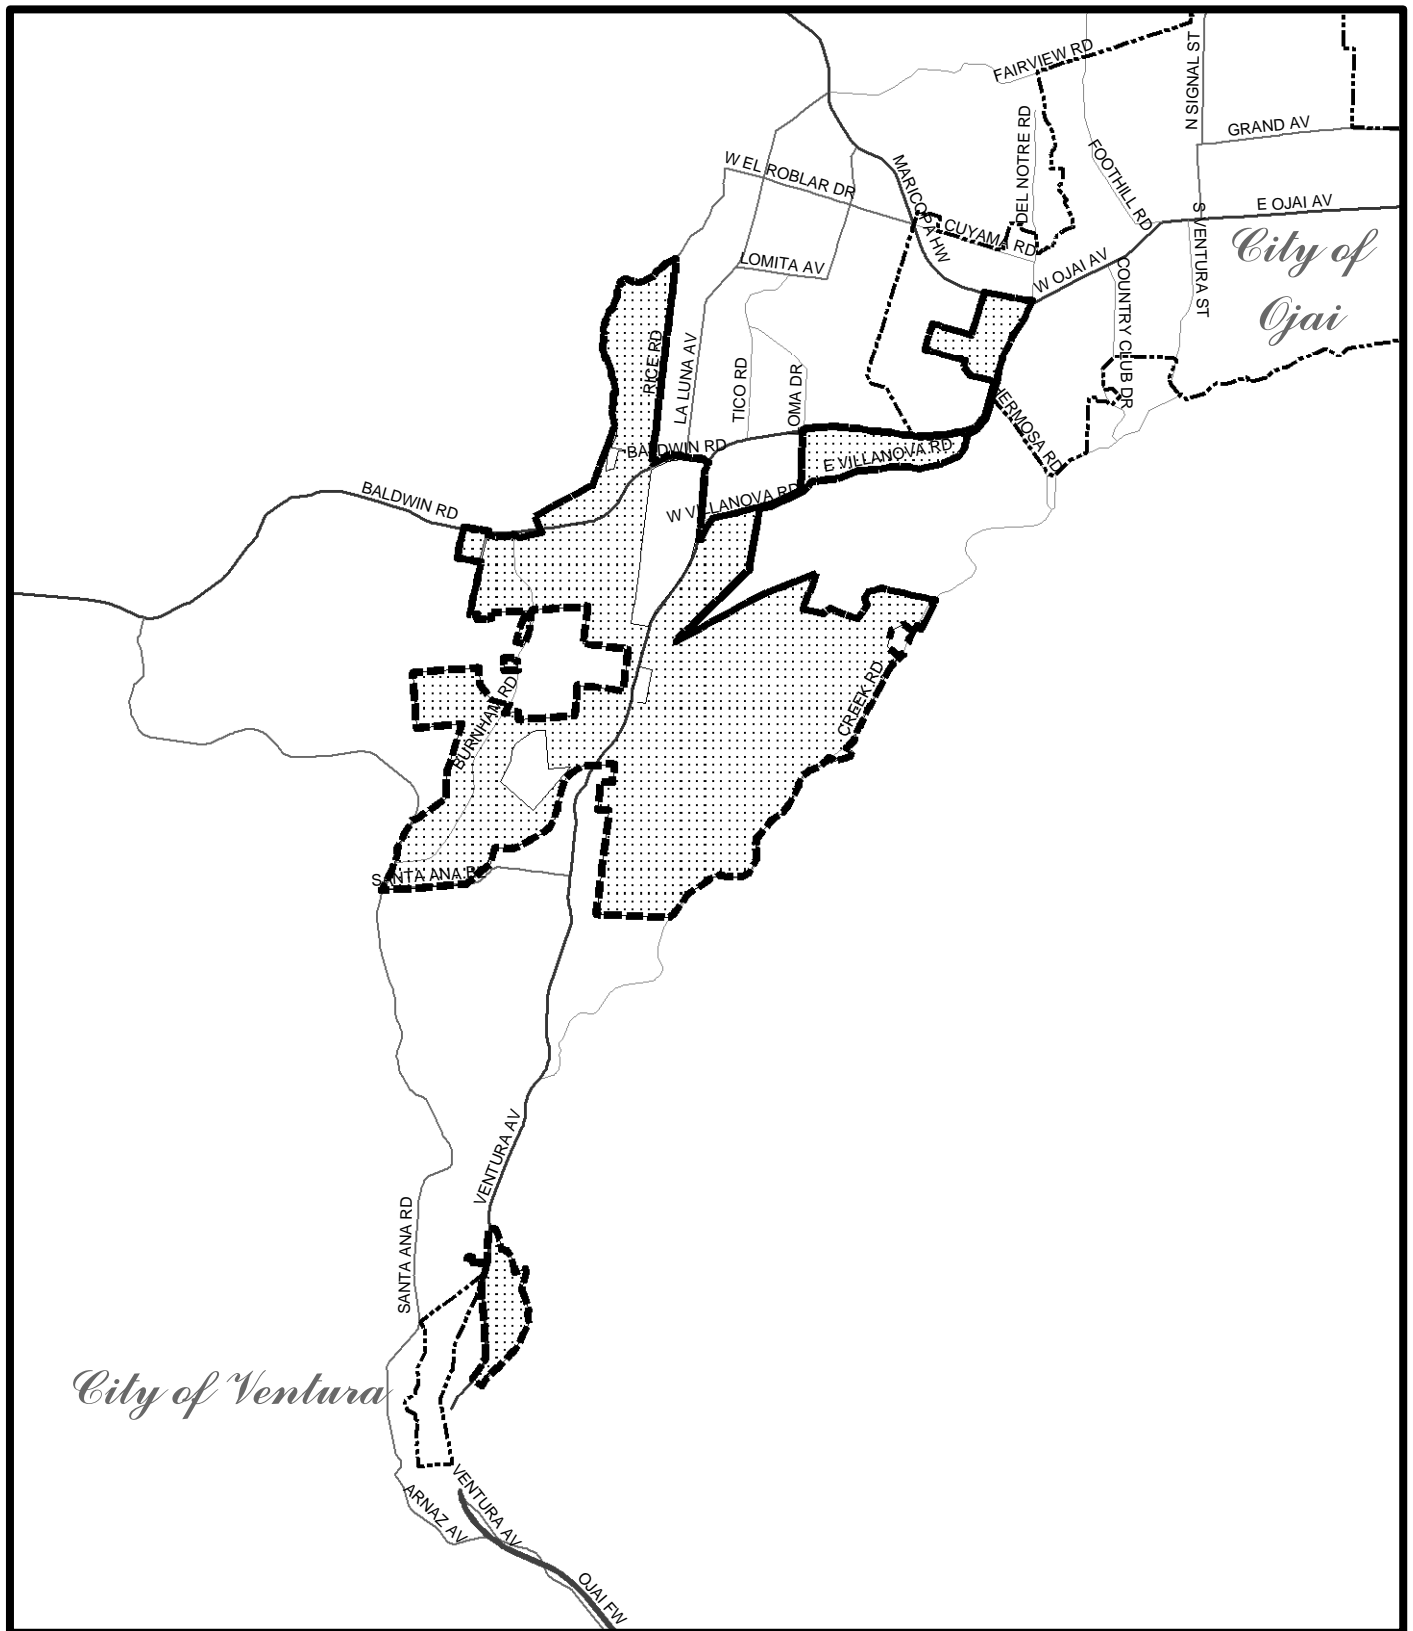

The study made no recommendations.

1993 Special District Study Recommendations

The study made no recommendations.

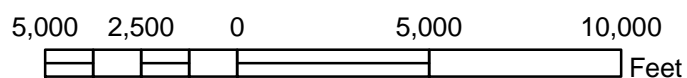

2001 Special District Study Recommendation

As part of the service review process per Government Code Section 56430, consideration should be given to consolidating the Meiners Oaks County Water District with this District.
